

# New Technology

## Blood Borne Pathogen Resistant Boots

Original S.W.A.T. Footwear's collection of waterproof boots now meet the ASTM F1671-07 standards for blood borne pathogen resistance. All of the models have a waterproof, breathable, internal membrane which effectively protects the wearer from blood borne pathogens.

The collection consists of three models: the affordable **WinX2** waterproof boot, the **Tactical Waterproof**, and the **Air M.T.** insulated side zip boot.

## New NIJ-06 Female Concealable Armor

Safariland™ recently released the **SM01F Type IIIA** which is part of the **SAVVY®**, **Armor for Women™** Series of concealable armor. It is the first NIJ-06 compliant, form-fitting female armor to be added to this brand. Tested against the .357 SIG and .44 Magnum rounds, the **SAVVY SM01F Type IIIA** is also the first NIJ-06 certified armor panel to use the exclusive waterproof protection of Gore-Tex® fabric as a panel covering.
