Warnock Fleet Technology Vehicle Project

New LIDAR System

Digital Ally, Inc. is introducing its new handheld vehicle speed detection system, the **LaserAlly LIDAR System**. Small and lightweight, **LaserAlly** features the ability to pinpoint the speed and direction of a vehicle in single or multilane traffic; a ruggedized waterproof enclosure; anti-jamming technology to defeat detectors; up to a 32 hour battery life from two C-cell batteries; and is upgradeable in the field via a USB port.

New Lightweight Compact Revolver (LCR™)

Sturm, Ruger & Company, Inc. recently introduced the **Ruger® LCR™-357**, a compact, five shot revolver chambered in .357 Magnum which weighs only 17 1/4 ounces. Although it's the same size as the original LCR chambered for .38 Special +P, the **LCR-357's** new blackened stainless steel frame easily handles full power .357 Magnum loads. Its weight effectively tames recoil when coupled with the LCR's patented recoil absorbing polymer fire control housing and a Hogue® cushioned Monogrip®.

The double-action-only **LCR-357** contains the same patented friction reducing cam which was introduced in the original LCR.
