

Digital·AllyTM

2015 Annual Report

BOARD OF DIRECTORS:

Stanton E. Ross

Chairman of the Board, CEO & President - since 2005

Leroy C. Richie

Lead Outside Director and Chairman of the
Nominating and Governance Committee

*Former VP and General Counsel for Chrysler Corporation
Former director of the Federal Trade Commission*

Daniel F. Hutchins

Director and Chairman of Audit Committee

Founder and principal of a public accounting firm

Elliot M. Kaplan

Director

*Attorney, legal corporate strategist in
non-traditional conflict resolution*

CORPORATE OFFICERS:

Stanton E. Ross

Chairman, CEO & President

Thomas J. Heckman

Chief Financial Officers, Treasurer & Secretary

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM:

RSM US, LLP

4801 Main Street, Suite 400
Kansas City, MO 66412

COUNSEL:

Christian J. Hoffman III Securities Counsel

Form 10-K

ANNUAL REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2015

TRANSITION REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____.

Commission file number: 001-33899

Digital Ally, Inc.

(Exact name of registrant as specified in its charter)

Nevada

(State or other jurisdiction of
incorporation or organization)

9705 Loiret Blvd., Lenexa, KS

(Address of principal executive offices)

20-0064269

(I.R.S. Employer Identification No.)

66219

(Zip)

Registrant's telephone, including area code: **(913) 814-7774**

Securities registered under Section 12(b) of the Exchange Act: **None**

Securities registered under Section 12(g) of the Exchange Act:

Common Stock, \$0.001 par value

(Title of class)

NASDAQ

(Name of each exchange on which registered)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

As of June 30, 2015, the aggregate market value of the Company's common equity held by non-affiliates computed by reference to the closing price (\$13.84) of the registrant's most recently completed second fiscal quarter was: **\$51,796,198.**

The number of shares of our common stock outstanding as of March 4, 2016 was: **5,248,481**

Documents Incorporated by Reference: None.

NOTE REGARDING FORWARD LOOKING STATEMENTS

This annual report on Form 10-K contains forward-looking statements as that term is defined in Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. In some cases, you can identify forward-looking statements by terminology such as “may,” “should,” “expects,” “plans,” “anticipates,” “believes,” “estimates,” “predicts,” “potential,” “continue,” “intends,” and other variations of these words or comparable words. In addition, any statements that refer to expectations, projections or other characterizations of events, circumstances or trends and that do not relate to historical matters are forward-looking statements. These forward-looking statements are based largely on our expectations or forecasts of future events, can be affected by inaccurate assumptions, and are subject to various business risks and known and unknown uncertainties, a number of which are beyond our control. Therefore, actual results could differ materially from the forward-looking statements contained in this document, and readers are cautioned not to place undue reliance on such forward-looking statements. These statements are only predictions and involve known and unknown risks, uncertainties and other factors, including the risks that may cause our or our industry’s actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by these forward-looking statements.

Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. You should not place undue reliance on these forward-looking statements, which speak only as of the date of this report. Except as required by law, we do not undertake to update or revise any of the forward-looking statements to conform these statements to actual results, whether as a result of new information, future events or otherwise.

As used in this annual report, “Digital Ally,” the “Company,” “we,” “us,” or “our” refer to Digital Ally, Inc., unless otherwise indicated.

PART I

Item 1. Business.

Overview

Digital Ally produces digital video imaging and storage products for use in law enforcement, security and commercial applications. Our current products are an in-car digital video/audio recorder contained in a rear-view mirror for use in law enforcement and commercial fleets, a system that provides our law enforcement customers with audio/video surveillance from multiple vantage points and hands-free automatic activation of body-worn cameras and in-car video systems; a weather-resistant mobile digital video recording system for use on motorcycles, ATV’s and boats, a miniature digital video system designed to be worn on an individual’s body; and a hand-held laser speed detection device that it is offering primarily to law enforcement agencies. We have active research and development programs to adapt its technologies to other applications. We have the ability to integrate electronic, radio, computer, mechanical, and multi-media technologies to create unique solutions to address needs in a variety of other industries and markets, including mass transit, school bus, taxi cab and the military. We sell our products to law enforcement agencies and other security organizations, consumer and commercial fleet operators through direct sales domestically and third-party distributors internationally. We have several new and derivative products in research and development that we anticipate will begin commercial production during 2016.

Corporate History

We were incorporated in Nevada on December 13, 2000 as Vegas Petra, Inc. From that date until November 30, 2004, when we entered into a Plan of Merger with Digital Ally, Inc., a Nevada corporation which was formerly known as Trophy Tech Corporation (the “Acquired Company”), we had not conducted any operations and were a closely-held company. In conjunction with the merger, we were renamed Digital Ally, Inc.

The Acquired Company, which was incorporated on May 16, 2003, engaged in the design, development, marketing and sale of bow hunting-related products. Its principal product was a digital video recording system for use in the bow hunting industry. It changed its business plan in 2004 to adapt its digital video recording system for use in the law enforcement and security markets. We began shipments of our in-car digital video rear view mirror in March 2006.

On January 2, 2008, we commenced trading on the NASDAQ Capital Market under the symbol “DGLY.” We conduct our business from 9705 Loiret Boulevard, Lenexa, Kansas 66219. Our telephone number is (913) 814-7774.

Products

We produce and sell digital audio/video recording, storage and other products in law enforcement and commercial applications. These product series were used primarily in law enforcement applications, all of which use the core competency of our technology in digital video compression, recording and storage. During 2011, we completed the launch of several derivative products as “event recorders” that can be used in taxi cab, limousine, ambulance and other commercial fleet vehicle applications. We have launched additional derivative products during 2012 through 2015. We also intend to produce and sell other digital video products in the future. These products incorporate our standards-based digital compression capability that allows the recording of significant time periods on a chip and circuit board which can be designed into small forms and stored. The following describes our product portfolio.

In-Car Digital Video Mirror System – DVM-100, DVM-400, DVM-750 and DVM-800

In-car video systems for patrol cars are now a necessity and have generally become standard. Current systems are primarily digital based systems with cameras mounted on the windshield and the recording device generally in the trunk, headliner, dashboard, console or under the seat of the vehicle. Most manufacturers have already developed and transitioned completely to digital video, but some have not transitioned totally to a fully solid-state digital system and continue to rely on hard-drive or DVD based systems which are less reliable and susceptible to heat, cold and vibration.

Our digital video rear view mirror unit is a self-contained video recorder, microphone and digital storage system that is integrated into a rear-view mirror, with a monitor, GPS and 900 MHz audio transceiver. Our system is more compact and unobtrusive than certain of our competitors because it requires no recording equipment to be located in other parts of the vehicle.

Our in-car digital video rear view mirror has the following features:

- wide angle zoom color camera;
- standards-based video and audio compression and recording;
- system is concealed in the rear view mirror, replacing factory rear view mirror;
- monitor in rear-view mirror is invisible when not activated;
- eliminates need for analog tapes to store and catalogue;
- easily installs in any vehicle;
- ability to integrate with body-worn cameras including auto-activation of either system;
- archives to computers (wirelessly) and to DVDs, CD-ROMs, or file servers;
- 900 MHz audio transceiver with automatic activation;
- marks exact location of incident with integrated GPS;
- playback using Windows Media Player;
- optional wireless download of stored video evidence;
- proprietary software protects the chain of custody; and
- records to rugged and durable solid state memory.

In-Car Digital Video “Event Recorder” System –DVM-250 Plus

We believe there are several other markets and industries that may find our in-car digital video rear view mirror unit useful, such as the ambulance, school bus, mass transit and delivery service industries. We market a product designed to address these commercial fleet markets with our DVM-250 Plus Event Recorders. The DVM-250 Plus is a rear-view mirror based digital audio and video recording system with many, but not all of, the features of our DVM-750 mirror systems at a lower price point. The DVM-250 Plus is designed to capture “events,” such as wrecks and erratic driving or other abnormal occurrences, for evidentiary or training purposes. These potential markets may find our units attractive from both a feature and cost perspective, compared to other providers. Our marketing efforts indicate that these commercial fleets are adopting this technology, in particular the ambulance and taxi-cab markets.

Miniature Body-Worn Digital Video System – FirstVU HD

This system is also a derivative of our in-car video systems, but is much smaller and lighter, more rugged and water-resistant to handle a hostile outdoor environment. These systems can be used in many applications and are designed specifically to be clipped to an individual's pocket or other outer clothing. The unit is self-contained and requires no external battery or storage devices. Current systems offered by competitors are digital based, but generally require a battery pack and/or storage device to be connected to the camera by wire or other means. We believe that our FirstVU HD product is more desirable for potential users than our competitors' offerings because of its video quality, small size, shape and lightweight characteristics. Our FirstVU HD integrates with our in-car video systems through our patented VuLink system allowing for automatic activation of both systems.

Compact HD Quality In-Car Digital Video (not in a rear-view mirror)-MicroVu HD

The MicroVu is a compact in-car video system that is mobile (not mounted in a rear-view mirror) which provides up to 1080p HD video recording. The MicroVu is very compact as the complete system is only 4" long by 1" high. The MicroVu is designed for simple installation and features advanced automatic login (RFID log-in) and interoperability with our body cameras through our VuLink products.

All-Weather Mobile Digital Video Systems – DVM-440 Ultra

These systems are derivatives of our in-car video systems, but are more rugged and water-proofed to handle a more hostile outdoor environment. These systems can be used in many applications and are designed specifically for use on motorcycles, ATVs and boats. The MicroVu is a smaller system than the DVM-440 Ultra measuring three inches by four and one-quarter inches by one inch and is designed for easy and unobtrusive use. Current systems are digital and VHS-based with cameras mounted in the frame of the motorcycle, ATV or boat and the recording device generally in the saddle-bag or other compartment. Most manufacturers have already developed or at least have begun transitioning to digital video, but many have had problems obtaining the appropriate technology.

VuLink, FleetVU Manager and VuVault.net

The VuLink system provides our law enforcement customers with audio/video surveillance from multiple vantage points in order to more fully capture an event and it allows the operator to quickly and easily reassemble the various recording devices. The VuLink enables body cameras and in-car video systems to be automatically or manually activated simultaneously.

VuVault.net is a cost-effective, fully expandable, law enforcement cloud storage solution powered by Microsoft Azure that provides redundant and security-enhanced storage of all uploaded videos.

FleetVU Manager is our web-based software for commercial fleet tracking and monitoring that features and manages video captured by our Video Event Data Recorders of incidents that require attention, such as accidents. This software solution features our cloud-based web portal that utilizes many of the features of our VUVault.NET law-enforcement cloud-based storage solution.

Hand-Held Speed Detection System – Laser Ally

This system is a lightweight, hand-held speed detection device that uses LIDAR (Light Detection and Ranging) technology rather than the traditional radar systems, which use sound waves. LIDAR systems are used in high congestion traffic areas that require extreme accuracy and identification of the subject vehicles. This system uses new technology that prevents the Laser Ally from being detected by current detectors or jammed by current jamming devices. This system was developed and manufactured by a third party vendor for us.

Other Products

During the last year, we have focused our research and development efforts to meet the varying needs of our customers, enhance our existing products and commence development of new products and product categories. Our research and development efforts are intended to maintain and enhance our competitiveness in the market niche we have carved out, as well as positioning us to compete in diverse markets outside of law enforcement.

Market and Industry Overview

Historically, our primary market has been domestic and international law enforcement agencies. In 2012, we expanded our scope by pursuing the commercial fleet vehicle and mass transit markets. In the future, given sufficient capital and market opportunity, we may address markets for private security, homeland security, general consumer and commercial. We have made inroads into certain commercial fleet and the ambulance service provider market, confirming that our DVM-250 Plus product and FleetVU Manager can become a significant revenue producer for us.

Law Enforcement

We believe that a valuable use of our various digital audio/video products may be the recording of roadside sobriety tests. Without some form of video or audio recording, court proceedings usually consist of the police officer's word against that of the suspect. Records show that conviction rates increase substantially where there is video evidence to back up officer testimony. Video evidence also helps to protect police departments against frivolous lawsuits.

The largest source of police video evidence today is in-car video. Unfortunately, some police cars still do not have in-car video, and in those that do, the camera usually points forward rather than to the side of the road where the sobriety test takes place. The in-car video is typically of little use for domestic violence investigations, burglary or theft investigations, disorderly conduct calls or physical assaults. In all of these cases, the FirstVU HD may provide recorded evidence of the suspect's actions and reactions to police intervention.

Additionally, motorcycle patrolmen rarely have video systems. We have developed the DVM-440 Ultra as a mobile application of our digital video recording system that can be used by motorcycle police and water patrol.

Crime scene investigations, including detailed photography, are typically a large part of the budgets of metropolitan police forces. The FirstVU may record a significant portion of such evidence at a much lower cost for gathering, analyzing and storing data and evidence.

Commercial and Other Markets

There are numerous potential applications for our digital audio/video camera products. We believe that other markets for our digital video systems, including the derivatives currently being developed, include private investigators, SWAT team members, over-the-road trucking fleets, airport security, municipal fire departments, and the U.S. military. Other commercial markets for our digital video systems include real estate appraisers, plumbers and electricians.

Schools

We believe our products and offerings may be of benefit in kindergarten through twelve grade school systems. We are currently assessing our entry into this potential market.

Medical applications

We believe our products and offerings may be of benefit in hospital and other medical services delivery systems. We are currently assessing our entry into this potential market.

Private Security Companies

There are thousands of private security agencies in the United States employing a large number of guards. Police forces use video systems for proof of correct conduct by officers, but private security services usually have no such tool. We believe that the FirstVU HD is an excellent management tool for these companies to monitor conduct and timing of security rounds. In addition to the FirstVU HD, the digital video security camera can provide fill-in security when guards have large areas to cover or in areas that do not have to be monitored around the clock.

Homeland Security Market

In addition to the government, U.S. corporations are spending heavily for protection against the potential of terrorist attacks. Public and private-sector outlays for antiterrorism measures and for protection against other forms of violence are significant. These are potential markets for our products.

Manufacturing

We have entered into contracts with manufacturers for the assembly of the printed circuit boards used in our products. Dedicated circuit board manufacturers are well-suited to the assembly of circuit boards with the complexity found in our products. Dedicated board manufacturers can spread the extensive capital equipment costs of circuit board assembly among multiple projects and customers. Such manufacturers also have the volume to enable the frequent upgrade to state-of-the-art equipment. We have identified multiple suppliers who meet our quality, cost, and performance criteria. We intend to use more than one source for circuit board assembly to ensure a reliable supply over time. We use contract manufacturers to manufacture our component subassemblies and may eventually use them to perform final assembly and testing. Due to the complexity of our products, we believe that it is important to maintain a core of knowledgeable production personnel for consistent quality and to limit the dissemination of sensitive intellectual property and will continue this practice. In addition, such technicians are valuable in our service and repair business to support our growing installed customer base. We had a non-exclusive supply and distribution agreement with DragonEye Technology, LLC (“Dragoneye”) regarding the sale and distribution of our Laser Ally product. This vendor developed and was the only manufacturer of this product. We have terminated our exclusive contract with Dragoneye and continue to sell and service this product on a nonexclusive basis. See “Legal Proceedings” for further details.

We also contract with a manufacturer in Asia for the production of our DVM-100, DVM-400, DVM-440 Ultra, DVM-250 Plus and DVM-800 products. The contract has no minimum purchase requirements and has an initial term through July 2016. We have the right to exercise three additional options to extend the contract for three additional years each. We are exploring the retention of one or more new contract manufacturers for these product lines and are in the process of terminating our relationship with our current contract manufacturer.

License Arrangements

We have entered into several agreements, including agreements with Sasken-Ingenient Technologies, Inc. (“Sasken”), Lead Technologies (“Lead”) and Pixel Forensics, Inc. (“Pixel), to license certain software products to be used in our video products. The licensors have written certain software for specific Texas Instrument chips which are included in our products or media analytics such as face redaction software. The licenses generally require upfront payments and contain automatic renewal provisions unless either party notifies the other of its intent to not renew prior to expiration or unless the agreement is terminated due to a material breach by the other party.

The following is a summary of our license agreements as of December 31, 2015:

License Type	Effective Date	Expiration Date	Terms
Production software license agreement	April 2005	April 2016	Automatically renews for one year periods unless terminated by either party.
Software sublicense agreement	October 2007	October 2016	Automatically renews for one year periods unless terminated by either party.
Media analytics	June 2015	May 2016	Either party may unilaterally terminate this agreement by written notice to the other party.

Sales and Marketing

In recent years, we have changed principally to an employee-based, direct sales force for domestic selling efforts that enables us to control and monitor its daily activities. In this connection, we have reduced the size of certain territories and consequently increased the sales personnel and changed the number of domestic sales

territories to 21 in order to better penetrate the market. The direct territory sales team is supported by a team of 9 inside sales coordinators, and a telesales specialist and a pre-sales solution design team. We have also added two bid specialists to coordinate large bid opportunities. We believe our employee-based model encourages our sales personnel in lower performing territories to improve their efforts and, consequently, their sales results. Our executive team also supports sales agents with significant customer opportunities by providing pricing strategies and customer presentation assistance. Our technical support personnel may also provide sales agents with customer presentations and product specifications in order to facilitate sales activities.

We use our direct sales force and international distributors to market our products. Our key promotional activities include:

- attendance at industry trade shows and conventions;
- direct sales, with a force of industry-specific sales individuals who identify, call upon and build on-going relationships with key purchasers and targeted industries;
- support of our direct sales with passive sales systems, including inside sales and e-commerce;
- print advertising in journals with specialized industry focus;
- direct mail campaigns targeted to potential customers;
- web advertising, including supportive search engines and website and registration with appropriate sourcing entities;
- public relations, industry-specific venues, as well as general media, to create awareness of our brand and our products, including membership in appropriate trade organizations; and
- brand identification through trade names associated with us and our products.

Competition

The law enforcement and security surveillance markets are extremely competitive. Competitive factors in these industries include ease of use, quality, portability, versatility, reliability, accuracy and cost. There are direct companies with competitive technology and products in the law enforcement and surveillance markets for all of our products and those we have in development. Many of these competitors have significant advantages over us, including greater financial, technical, marketing and manufacturing resources, more extensive distribution channels, larger customer bases and faster response times to adapt new or emerging technologies and changes in customer requirements. Our primary competitors include L-3 Mobile-Vision, Inc., Coban Technologies, Inc., Watchguard, Kustom Signals, Panasonic System Communications Company, International Police Technologies, Inc. and a number of other competitors who sell or may in the future sell in-car video systems to law enforcement agencies. Our primary competitors in the body-worn camera market include TASER International, Inc. and VieVU, Inc. We face similar and intense competitive factors for our event recorders in the commercial fleets and mass transit markets as we do in the law enforcement and security surveillance markets. We will also compete with any company making surveillance devices for commercial use. There can be no assurance that we will be able to compete successfully in these markets. Further, there can be no assurance that new and existing companies will not enter the law enforcement and security surveillance markets in the future.

The commercial fleet security and surveillance markets are also very competitive. There are direct competitors for our DVM-250 Plus “event recorders” which several may have greater financial, technical marketing, and manufacturing resources than we do. Our primary competitors in the commercial fleet sector include Lytx, Inc. (previously DriveCam, Inc.) and SmartDrive Systems.

Intellectual Property

Our ability to compete effectively will depend on our success in protecting our proprietary technology, both in the United States and abroad. We have filed for patent protection in the United States and certain other countries to cover certain design aspects of our products. However, we license the critical technology on which our products are based from third parties, including Sassen-Ingenient Technologies, Inc. and Lead Technologies.

Some of these patent applications are still under review by the U.S. Patent Office and, therefore, we have not yet been issued all of the patents that we applied for in the United States. We were issued several patents during 2014 including a patent on our VuLink product which provides automatic bi-directional triggering of our body-worn camera and our in-car video systems. No assurance can be given which, or any, of the patents relating to our

existing technology will be issued from the United States or any foreign patent offices. Additionally, no assurance can be given that we will receive any patents in the future based on our continued development of our technology, or that our patent protection within and/or outside of the United States will be sufficient to deter others, legally or otherwise, from developing or marketing competitive products utilizing our technologies.

We have entered into supply and distribution agreements with several companies that produce certain of our products, including our Laser Ally, FirstVU HD, DVM-100, DVM-250, DVM-500 Ultra, and DVM-800 products. These supply and distribution agreements contain certain confidentiality provisions that protect our proprietary technology, as well as that of the third party manufacturers.

In addition to seeking patent protection, we rely on trade secrets, know-how and continuing technological advancement to seek to achieve and thereafter maintain a competitive advantage. Although we have entered into or intend to enter into confidentiality and invention agreements with our employees, consultants and advisors, no assurance can be given that such agreements will be honored or that we will be able to effectively protect our rights to our unpatented trade secrets and know-how. Moreover, no assurance can be given that others will not independently develop substantially equivalent proprietary information and techniques or otherwise gain access to our trade secrets and know-how.

Taser International, Inc. (“TASER”) a competitor in our body-camera market, requested that the United States Patent & Trademark Office (“USPTO”) commence an ex parte reexamination of our U.S. Patent No. 8,781,292 (‘292 Patent). The USPTO granted this request and has completed its reexamination. The USPTO has confirmed the validity of our ‘292 patent which relates to our auto-activation technology for law enforcement body cameras. We have filed suit in the U.S. District Court for the District of Kansas against TASER, alleging willful patent infringement against TASER’s Axon body camera product line. On February 2, 2016, we received notification that the USPTO has issued another patent relating to its auto-activation technology for law enforcement cameras. U.S. Patent No. 9,253,452 (“the ‘452 patent”) generally covers the automatic activation and coordination of multiple recording devices in response to a triggering event such as a law enforcement officer activating the light bar on the vehicle. We have added TASER’s willful infringement of the ‘452 patent to our existing lawsuit.

Despite the USPTO’s recognition of the validity of the ‘292 patent and ‘452 patent, TASER continues to offer for sale, sell, and market its Axon technology in disregard of our federally protected patent rights. As a result, we are aggressively challenging TASER’s infringing conduct in our lawsuit against it, seeking both monetary damages and a permanent injunction preventing TASER from continuing to sell its Axon Signal technology.

We believe the outcome of this infringement lawsuit will have meaningful effects upon the entire body-worn camera market within the United States over the foreseeable future.

Employees

We had 154 full-time employees as of December 31, 2015. Our employees are not covered by any collective bargaining agreement and we have never experienced a work stoppage. We believe that our relations with our employees are good.

Item 1A. Risk Factors.

Not applicable.

Item 1B. Unresolved Staff Comments.

None.

Item 2. Properties.

We entered into a non-cancellable, long-term facility lease in September 2012 to combine all of our operations into one location, commencing in November 2012. The new facility contains approximately 33,776 square feet and is located at 9705 Loiret Boulevard, Lenexa, Kansas 66219. The lease will terminate on April 1, 2020. The monthly rent ranges from \$35,634 to \$38,533 over the term.

Item 3. Legal Proceedings.

The Company is subject to various legal proceedings arising from normal business operations. Although there can be no assurances, based on the information currently available, management believes that it is probable that the ultimate outcome of each of the actions will not have a material adverse effect on the consolidated financial statements of the Company. However, an adverse outcome in certain of the actions could have a material adverse effect on the financial results of the Company in the period in which it is recorded.

On June 5, 2013, we filed a lawsuit in the District Court of Johnson County, Kansas against Dragoneye. We had entered into a supply and distribution agreement with Dragoneye on May 1, 2010 under which we were granted the right to sell and distribute a proprietary law enforcement speed measurement device and derivatives to our customers under the trade name LaserAlly. The parties amended the agreement on January 31, 2012. In our complaint we alleged that Dragoneye breached the contract because it failed to maintain as confidential information our customer list; it infringed on our trademarks, including LaserAlly and Digital Ally; it tortiously interfered with our existing contracts and business relationships with our dealers, distributors, customers and trading partners; and it engaged in unfair competition and violated the Kansas Uniform Trade Secrets Statutes. We amended the complaint to include claims regarding alleged material defects in the products supplied under the agreement. We participated in a mediation of the lawsuit on August 12, 2015 and agreed to an omnibus resolution of the matter. The settlement includes the return of and repair free of charge of all LaserAlly units we currently hold and future customer returned units exhibiting the same or similar failure. Dragoneye was allowed no more than 120 days from October 1, 2015 under which to repair all units, upgrade all units to current firmware release and to re-certify the units. We will remit the unpaid balance of approximately \$191,000 (\$91,684.47 remaining at December 31, 2015) recorded in accounts payable to Dragoneye in five payments concurrent with the repair and return of units by Dragoneye. Furthermore, all of the remaining minimum contractual purchase requirements will be voided. On August 25, 2015, the judge approved the parties' joint stipulation of dismissal with prejudice, which finalized the settlement.

On October 25, 2013, we filed a complaint in the United States District Court for the District of Kansas to eliminate threats by a competitor, Utility Associates, Inc. ("Utility"), of alleged patent infringement regarding U.S. Patent No. 6,831,556 (the "'556 patent"). Specifically, the lawsuit seeks a declaration that our mobile video surveillance systems do not infringe any claim of the '556 patent. We became aware that Utility had mailed letters to current and prospective purchasers of our mobile video surveillance systems threatening that the use of such systems purchased from third parties not licensed to the '556 patent would create liability for them for patent infringement. We reject Utility's assertion and will vigorously defend the right of end-users to purchase such systems from providers other than Utility. The United States District Court for the District of Kansas dismissed the lawsuit because it decided that Kansas was not the proper jurisdictional forum for the dispute. The District Court's decision was not a ruling on the merits of the case. We appealed the decision and the Federal Circuit affirmed the District Court's previous decision.

In addition, we began proceedings to invalidate the '556 patent through a request for inter partes review of the '556 patent at the USPTO. On July 27, 2015, the USPTO invalidated key claims in Utility's '556 Patent. The Final Decision from the USPTO significantly curtails Utility's ability to threaten law enforcement agencies, municipalities, and others with infringement of the '556 Patent. Utility has appealed this decision to the United States Court of Appeals for the Federal Circuit. Briefs have not yet been filed and no schedule for oral argument has been issued. We believe Utility will have a difficult time convincing the appellate court to overturn the decision of the USPTO.

On June 4, 2014 we filed an Unfair Competition lawsuit against Utility in the United States District Court for the District of Kansas. In the lawsuit we contend that Utility has defamed us and illegally interfered with our contracts, customer relationships and business expectancies by falsely asserting to our customers and others that our products violate the '556 Patent, of which Utility claims to be the holder.

Our suit also includes claims against Utility for tortious interference with contract and violation of the Kansas Uniform Trade Secrets Act (KUSTA), arising out of Utility's employment of one of our employees, in violation of that employee's Non-Competition and Confidentiality agreements with us. In addition to damages, we seek temporary, preliminary, and permanent injunctive relief, prohibiting Utility from, among other things, continuing to threaten or otherwise interfere with our customers. On March 4, 2015, an initial hearing was held upon our request for injunctive relief.

Based upon facts revealed at the March 4, 2015 hearing, on March 16, 2015, our attorneys sought leave to amend our Complaint in the Kansas suit to assert additional claims against Utility. Those new claims include claims of actual or attempted monopolization, in violation of § 2 of the Sherman Act, claims arising under a new Georgia statute that prohibits threats of patent infringement in “bad faith”, and additional claims of unfair competition/false advertising in violation of § 63(a) of the Lanham Act. As these statutes expressly provide, we will seek treble damages, punitive damages and attorneys’ fees as well as injunctive relief. The Court concluded its hearing on April 22, 2015, and allowed us leave to amend our complaint, but denied our preliminary injunction. The case is now in the discovery stage. However, we believe that the USPTO’s final decision issued on July 27, 2015 will provide us with substantial basis to pursue our claims either through court trial or by summary judgment motions and we intend to pursue recovery from Utility, its insurers and other parties, as appropriate.

On June 13, 2014, Utility filed suit in the United States District Court for the Northern District of Georgia against us alleging infringement of the ‘556 patent. The suit was served on us on June 20, 2014. As alleged in our first filed lawsuit described above, we believe the ‘556 patent is both invalid and not infringed. Further, the USPTO has issued its final decision invalidating 23 of the 25 claims asserted in the ‘556 Patent, as noted above. We believe that the suit filed by Utility is without merit and we will vigorously defend the claims asserted against us. An adverse resolution of the foregoing litigation or patent proceedings could have a material adverse effect on our business, prospects, results of operations, financial condition, and liquidity. The Court stayed all proceedings with respect to this lawsuit pending the outcome of the patent review performed by the USPTO and the appellate court. Based on the USPTO’s final decision to invalidate substantially all claims contained in the ‘556 patent, we intend to file for summary judgment in our favor if Utility does not request outright dismissal.

The Company received notice in April 2015 that TASER, one of our competitor’s, had commenced an action in the USPTO for a re-examination of our U.S. Patent No. 8,781,292 (“the ‘292 Patent”). A re-examination is essentially a request that the Patent Office review whether the patent should have issued in its present form in view of the “prior art,” e.g., other patents in the same technology field. The prior art used by our competitor to request the re-examination is a patent application (which never issued into a patent) assigned to an unrelated third party and was not the result of any of TASER’s own research and development efforts.

The Company owns the ‘292 Patent, which is directed to a system that determines when a recording device, such as a law enforcement officer’s body camera or in-car video recorder, begins recording and automatically instructs other recording devices to begin recording. The technology described in the ‘292 Patent is incorporated in our VuLink product.

On August 17, 2015 the USPTO issued a first, non-final action rejecting all 20 claims of the ‘292 Patent, which was undergoing an ex parte re-examination by the USPTO. We were provided the opportunity to discuss the merits of the prior art and the scope of the patent claims with the patent Examiner handling the reexamination and to amend the patent claims. On January 14, 2016 the USPTO ultimately rejected TASER’s efforts and confirmed the validity of the ‘292 patent with 59 claims covering various aspects of our auto-activation technology. On February 2, 2016 the USPTO issued another patent relating to our auto-activation technology for law enforcement cameras. U.S. Patent No. 9,253,452 (“the ‘452 patent”) generally covers the automatic activation and coordination of multiple recording devices in response to a triggering event such as a law enforcement officer activating the light bar on the vehicle.

We filed suit on January 15, 2016 in the U.S. District Court for the District of Kansas (Case No: 2:16-cv-02032) against TASER, alleging that TASER willfully infringed the ‘292 Patent by selling and offering to sell its Axon camera product line and Signal Performance Power Magazine. The lawsuit was initiated after the USPTO reconfirmed the validity of the ‘292 patent. On February 2, 2016, we amended our complaint against TASER, further alleging that Taser is directly and indirectly liable for infringing the ‘452 Patent. Our amended complaint seeks both monetary damages and a permanent injunction against TASER for infringing both the ‘452 and ‘292 Patents.

In addition to the ‘452 Patent infringement claims, the February 2, 2016 amended complaint added a new set of claims to the lawsuit alleging that TASER conspired to keep us out of the marketplace by engaging in improper, unethical, and unfair competition. The amended lawsuit alleges TASER bribed officials and otherwise conspired to secure no-bid contracts for its products in violation of both state law and federal antitrust law. Our lawsuit also seeks monetary and injunctive relief, including treble damages, for these alleged violations.

On February 19, 2016 TASER asked for and was granted an extension of time to answer or otherwise plead to the complaint alleging willful patent infringement, the bribery of officials and otherwise conspired to secure no-bid contracts for its products in violation of both state law and federal antitrust law. On March 4, 2016, TASER filed a motion to dismiss our complaint which is now pending before the court.

On or about May 22, 2014, Stephen Gans, a former director and former principal shareholder of us, filed a complaint in the Eighth Judicial District Court, Clark County, Nevada that asserts claims against us and Stanton E. Ross, Leroy C. Richie, Daniel F. Hutchins and Elliot M. Kaplan (the “Defendant Directors”), who are members of its Board of Directors. We were served with the complaint on May 28, 2014. Among other things, the complaint alleged (i) that the Defendant Directors breached their fiduciary duties by failing to consider a financing proposal offered by Mr. Gans and his affiliates; and (ii) that the Defendant Directors, acting at the direction of Stanton E. Ross, did not independently and objectively evaluate Mr. Gans’ protestations about certain alleged transactions between us and Infinity Energy Resources, Inc., and by so doing, breached their fiduciary duties. We and the Defendant Directors vigorously defended the claims asserted against us and them. We and the Defendant Directors filed a response denying all of the plaintiff’s allegations and have asserted counter-claims that allege that Gans committed improper acts that included: (a) failing to disclose the nature and substance of an SEC investigation of Gans; (b) engaging in potential insider trading; (c) misappropriating our confidential information; (d) attempting to use his position as a director to personally enrich himself; and (e) making unauthorized, misleading, and factually inaccurate filings to the SEC about us.

On December 11, 2014, the parties agreed in principle to compromise and dismiss with prejudice substantially all of their claims. Within the scope of that settlement are each of the “shareholder derivative claims” that Gans had asserted against us and the Defendant Directors. The settlement to which the parties agreed resulted in no monetary recovery by any party. On April 7, 2015 the Court approved the settlement of all shareholder derivative claims and the matter is now closed.

We are also involved as a plaintiff and defendant in ordinary, routine litigation and administrative proceedings incidental to its business from time to time, including customer collections, vendor and employment-related matters. Management believes the likely outcome of any other pending cases and proceedings will not be material to its business or its financial condition.

Item 4. Mine Safety Disclosures.

Not applicable.

PART II

Item 5. Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Market Prices

Our common stock commenced trading on the NASDAQ Capital Market on January 2, 2008 under the symbol “DGLY,” and continues to do so. From July 2007 until we became listed on the NASDAQ Capital Market, our common stock was traded on the OTC Bulletin Board and prior to that it was quoted in the “Pink Sheets.”

The high/low closing prices of our common stock were as follows for the periods below. In addition, the quotations below reflect inter-dealer bid prices without retail markup, markdown, or commission and may not represent actual transactions:

	<u>High Close</u>	<u>Low Close</u>
<u>Year Ended December 31, 2015</u>		
1st Quarter	\$15.46	\$10.27
2nd Quarter	\$18.30	\$12.42
3rd Quarter	\$13.82	\$5.84
4th Quarter	\$7.90	\$3.99

Year Ended December 31, 2014

1st Quarter	\$9.97	\$6.00
2nd Quarter	\$6.49	\$3.03
3rd Quarter	\$33.59	\$3.10
4th Quarter	\$21.00	\$10.41

Holders of Common Stock

As of December 31, 2015, we had approximately 89 shareholders of record for our common stock.

Dividend Policy

To date, we have not declared or paid cash dividends on our shares of common stock. The holders of our common stock will be entitled to non-cumulative dividends on the shares of common stock, when and as declared by our board of directors, in its discretion. We intend to retain all future earnings, if any, for our business and do not anticipate paying cash dividends in the foreseeable future.

Any future determination to pay cash dividends will be at the discretion of our board of directors and will be dependent upon our financial condition, results of operations, capital requirements, general business conditions and such other factors as our board of directors may deem relevant.

Securities Authorized for Issuance under Equity Compensation Plans

Our board of directors adopted the 2005 Stock Option and Restricted Stock Plan (the “2005 Plan”) on September 1, 2005. The 2005 Plan authorized us to reserve 312,500 shares of our common stock for issuance upon exercise of options and grant of restricted stock awards. The 2005 Plan terminated in 2015 with 28 shares reserved for awards that are now unavailable for issuance.

On January 17, 2006, our board of directors adopted the 2006 Stock Option and Restricted Stock Plan (the “2006 Plan”). The 2006 Plan authorizes us to reserve 187,500 shares for future grants under it. At December 31, 2015, there were 30 shares reserved for awards available for issuance under the 2006 Plan.

On January 24, 2007, our board of directors adopted the 2007 Stock Option and Restricted Stock Plan (the “2007 Plan”). The 2007 Plan authorizes us to reserve 187,500 shares for future grants under it. At December 31, 2015, there were 9 shares reserved for awards available for issuance under the 2007 Plan.

On January 2, 2008, our board of directors adopted the 2008 Stock Option and Restricted Stock Plan (the “2008 Plan”). The 2008 Plan authorizes us to reserve 125,000 shares for future grants under it. At December 31, 2015, there were 574 shares reserved for awards available for issuance under the 2008 Plan.

On March 18, 2011, our board of directors adopted the 2011 Stock Option and Restricted Stock Plan (the “2011 Plan”). The 2011 Plan authorizes us to reserve 62,500 shares for future grants under it. At December 31, 2015, there were 89 shares reserved for awards available for issuance under the 2011 Plan.

On March 22, 2013, our board of directors adopted the 2013 Stock Option and Restricted Stock Plan (the “2013 Plan”). The 2013 Plan was amended on March 28, 2014 and November 14, 2014 to increase the number of shares authorized and reserved for issuance under the 2013 Plan to a total of 300,000. At December 31, 2015, there were no shares available for issuance as awards under the 2013 Plan, as amended.

On March 27, 2015, our board of directors adopted the 2015 Stock Option and Restricted Stock Plan (the “2015 Plan”). The 2015 Plan authorizes us to reserve 300,000 shares for future grants under it. At December 31, 2015, there were 74,300 shares reserved for awards available for issuance under the 2015 Plan.

The 2005 Plan, 2006 Plan, 2007 Plan, 2008 Plan, 2011 Plan, 2013 Plan and 2015 Plan are referred to as the “Plans.”

The Plans authorize us to grant (i) to the key employees incentive stock options (except for the 2007 Plan) to purchase shares of common stock and non-qualified stock options to purchase shares of common stock and restricted stock awards, and (ii) to non-employee directors and consultants' non-qualified stock options and restricted stock. The Compensation Committee of our board of directors administers the Plans by making recommendations to the board or determinations regarding the persons to whom options or restricted stock should be granted and the amount, terms, conditions and restrictions of the awards.

The Plans allow for the grant of incentive stock options (except for the 2007 Plan), non-qualified stock options and restricted stock awards. Incentive stock options granted under the Plans must have an exercise price at least equal to 100% of the fair market value of the common stock as of the date of grant. Incentive stock options granted to any person who owns, immediately after the grant, stock possessing more than 10% of the combined voting power of all classes of our stock, or of any parent or subsidiary corporation, must have an exercise price at least equal to 110% of the fair market value of the common stock on the date of grant. Non-statutory stock options may have exercise prices as determined by our Compensation Committee.

The Compensation Committee is also authorized to grant restricted stock awards under the Plans. A restricted stock award is a grant of shares of the common stock that is subject to restrictions on transferability, risk of forfeiture and other restrictions and that may be forfeited in the event of certain terminations of employment or service prior to the end of a restricted period specified by the Compensation Committee.

On July 31, 2008, we filed registration statements on Form S-8 and an amendment to a previously filed Form S-8 with the SEC which registered 812,500 shares to be issued upon exercise of the stock options underlying the 2005 Plan, 2006 Plan, 2007 Plan and 2008 Plan. On March 28, 2012, we filed a registration statement on Form S-8, which registered 62,500 shares to be issued upon exercise of stock options underlying the 2011 Stock Plan. On July 25, 2013, we filed a registration statement on Form S-8, which registered 100,000 shares to be issued upon exercise of stock options underlying the 2013 Stock Plan. On October 1, 2014 we filed a registration statement on Form S-8, which registered 100,000 additional shares underlying the 2013 Plan. On June 22, 2015 we filed a registration statement on Form S-8, which registered the 300,000 shares underlying the 2015 Plan.

The following table sets forth certain information regarding the stock option plans adopted by the Company as of December 31, 2015:

Plan category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted-average exercise price of outstanding options, warrants and rights (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))(c)
Equity compensation plans approved by stockholders	238,331	\$20.95	74,993
Equity compensation plans not approved by stockholders	0,359	\$19.05	9
Total all plans	328,690	\$20.43	75,002

Recent Sales of Unregistered Securities

We entered into a Securities Purchase Agreement (the "Purchase Agreement") on July 22, 2015 with two investors pursuant to which we issued and sold in an at-the-market registered direct offering (the "Offering"), an aggregate of 879,766 shares (the "Shares") of common stock at an offering price of \$13.64 per share, for gross proceeds of \$12,000,008 before the deduction of the placement agent fee and other offering expenses. In addition to the common stock purchased, the investors received a registered short-term warrant (the "Series A Warrant") exercisable to purchase a total of 437,086 shares of common stock at an exercise price of \$13.43 per share. The Series A Warrants are immediately exercisable and expire on July 22, 2017. We offered the Shares and the Series A Warrants pursuant to a registration statement on Form S-3 (File No. 333-202944), which was declared effective by the Securities and Exchange Commission (the "Commission") on May 18, 2015 (the "Registration Statement").

In a concurrent private placement (the “Private Placement”), we issued two additional warrants to the investors (the “Series B Warrants” and “Series C Warrants”), collectively with the Shares and the Series A Warrants the (“Securities”), at an exercise price of \$13.43 per share. The investors received Series B Warrants to purchase a total of 222,738 shares of common stock and Series C Warrants to purchase a total of 879,766 shares of common stock. The Series B Warrants and Series C Warrants are both immediately exercisable and the Series B Warrants expire on July 22, 2017 and the Series C Warrants expire on January 22, 2021.

Subject to limited exceptions, the holders of the Warrants do not have the right to exercise any portion of its warrants if the holder, together with its affiliates, would beneficially own in excess of 4.99% or 9.99% of the number of shares of Common Stock outstanding immediately after giving effect to such exercise (the “Beneficial Ownership Limitation”); provided, however, that upon 61 days’ prior notice to the Company, the holder may increase or decrease the Beneficial Ownership Limitation, but in no event shall the Beneficial Ownership Limitation exceed 9.99%.

We were required to file a registration statement on Form S-3 relating to the issuance of the Series B Warrants and Series C Warrants to provide for the resale of the shares of common stock issuable upon the exercise of such Warrants. We filed a registration statement on Form S-3 (File No. 333-206699), which was declared effective by the Commission on September 15, 2015 (the “Registration Statement”).

We entered into a Placement Agreement (the “Placement Agreement”) pursuant to which we engaged WestPark Capital, Inc. as the sole placement agent in connection with the Offering and the Private Placement. We paid the Placement Agent a placement agent fee in cash of \$720,000 and reimbursed approximately \$30,000 of its out-of-pocket expenses. Other expenses of the offering totaled \$26,723, which included accounting, legal, printing and other expenses. Total issuance costs were \$776,723, which were deducted from the gross proceeds of the offering resulting in net proceeds of \$11,223,285.

We used the net proceeds to retire \$2.5 million principal amount of subordinated notes and for general corporate purposes. We relied on the exemption from registration set forth in Section 4(a)(2) of the Securities Act of 1933 for issuance of the Series B Warrants and Series C Warrants in the Private Placement.

(c) Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased [1]	Average Price Paid per Share [1]	(c)Total Number of Shares Purchased as Part of Publicly Announced Plans of Programs [1]	(d)Maximum number of Shares that May Yet Be Purchased Under the Plans or Programs [2]
August 25 to 31, 2015	----	----	----	----
September 1 to 30, 2015	----	----	----	----
October 1 to 31, 2015	----	----	----	----

December 1 to 31, 2015	----	----	----	----

[1] On August 25, 2015, the Board of Directors approved the Stock Repurchase Program that authorized the repurchase of up to \$2.5 million of the Company’s common stock in the open market, or in privately negotiated transactions. No shares have been repurchased under this program as of September 30, 2015. The repurchases, if and when made, will be subject to market conditions, applicable rules of the Securities and Exchange Commission and other factors. Purchases may be commenced, suspended or discontinued at any time.

[2] The Stock Repurchase Program authorizes the repurchase of up to \$2.5 million of common stock. The number of shares yet to be purchased is variable based upon the purchase price of the shares at the point in time they are acquired.

Item 6. Selected Financial Data.

Not applicable.

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operation.

This Report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. The words “believe,” “expect,” “anticipate,” “intend,” “estimate,” “may,” “should,” “could,” “will,” “plan,” “future,” “continue,” and other expressions that are predictions of or indicate future events and trends and that do not relate to historical matters identify forward-looking statements. These forward-looking statements are based largely on our expectations or forecasts of future events, can be affected by inaccurate assumptions, and are subject to various business risks and known and unknown uncertainties, a number of which are beyond our control. Therefore, actual results could differ materially from the forward-looking statements contained in this document, and readers are cautioned not to place undue reliance on such forward-looking statements. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. A wide variety of factors could cause or contribute to such differences and could adversely impact revenues, profitability, cash flows and capital needs. There can be no assurance that the forward-looking statements contained in this document will, in fact, transpire or prove to be accurate.

Factors that could cause or contribute to our actual results differing materially from those discussed herein or for our stock price to be adversely affected include, but are not limited to: (1) our losses in recent years, including fiscal 2014 and 2015; (2) macro-economic risks from the effects of the economic downturn and decrease in budgets for the law-enforcement community; (3) our ability to increase revenues, increase our margins and return to consistent profitability in the current economic and competitive environment; (4) our operation in developing markets and uncertainty as to market acceptance of our technology and new products; (5) the impact of the federal government’s stimulus program on the budgets of law enforcement agencies, including the timing, amount and restrictions on funding; (6) our ability to deliver our new product offerings as scheduled and have such new products perform as planned or advertised; (7) whether there will be commercial markets, domestically and internationally, for one or more of our new products, and the degree to which the interest shown in our new products, including the FirstVU HD, VuLink, VuVault.net, FleetVU and MicroVU HD, will continue to translate into sales during 2016; (8) our ability to maintain or expand our share of the market for our products in the domestic and international markets in which we compete, including increasing our international revenues to their historical levels; (9) our ability to produce our products in a cost-effective manner; (10) competition from larger, more established companies with far greater economic and human resources; (11) our ability to attract and retain quality employees; (12) risks related to dealing with governmental entities as customers; (13) our expenditure of significant resources in anticipation of a sale due to our lengthy sales cycle and the potential to receive no revenue in return; (14) characterization of our market by new products and rapid technological change; (15) our dependence on sales of our DVM-800, FirstVU, First VU HD, DVM-250 and DVM-500 Plus products; (16) potential that stockholders may lose all or part of their investment if we are unable to compete in our markets and return to profitability; (17) defects in our products that could impair our ability to sell our products or could result in litigation and other significant costs; (18) our dependence on key personnel; (19) our reliance on third party distributors and sales representatives for part of our marketing capability; (20) our dependence on a few manufacturers and suppliers for components of our products and our dependence on domestic and foreign manufacturers for certain of our products; (21) our ability to protect technology through patents; (22) our ability to protect our proprietary technology and information as trade secrets and through other similar means; (23) risks related to our license arrangements; (24) our revenues and operating results may fluctuate unexpectedly from quarter to quarter; (25) sufficient voting power by coalitions of a few of our larger stockholders, including directors and officers, to make corporate governance decisions that could have significant effect on us and the other stockholders; (26) sale of substantial amounts of our common stock that may have a depressive effect on the market price of the outstanding shares of our common stock; (27) possible issuance of common stock subject to options and warrants that may dilute the interest of stockholders; (28) our ability to comply with Sarbanes-Oxley Act of 2002 Section 404 as it may be required; (29) our nonpayment of dividends and lack of plans to pay dividends in the future; (30) future sale of a substantial number of shares of our common stock that could depress the trading price of our common stock, lower our value and make it more difficult for us to raise capital; (31) our additional securities available for issuance, which, if issued, could adversely affect the rights of the holders of our common stock; (32) our stock price is likely to be highly volatile due to a number of factors, including a relatively limited public float; (33) whether the legal actions that the Company is taking or has taken against Utility Associates and TASER will achieve their intended objectives; (34) whether Utility Associates will appeal the United States Patent Office (“USPTO”) final decision on the ’556 Patent and if so, whether such appeal will be successful in whole or in part; (35) whether the USPTO rulings will curtail, eliminate or otherwise have an effect on the actions of TASER and Utility Associates respecting us, our products and customers; (36) whether the

remaining two claims under the '556 Patent have applicability to us or our products; and (37) indemnification of our officers and directors.

Current Trends and Recent Developments for the Company

Overview

We supply technology-based products utilizing our portable digital video and audio recording capabilities, for the law enforcement and security industries and for the commercial fleet and mass transit markets. We have the ability to integrate electronic, radio, computer, mechanical, and multi-media technologies to create unique solutions to our customers' requests. We began shipping our flagship digital video mirror product in March 2006. We have developed additional products to complement our DVM-500 and DVM-750, our original in-car digital video products, including lower priced in-car digital video mirrors (the DVM-100, DVM-400, DVM-800 and MicroVU HD), and body worn camera (FirstVU HD) products designed for law enforcement usage. Since 2011 we have launched the following new products: the FirstVU HD; DVM-800; the MicroVU HD; the patented VuLink product which integrates our body-worn cameras with our in-car systems by providing hands-free automatic activation; and the new line of digital video mirrors (the DVM-250 and DVM-250 Plus) that serve as "event recorders" for the commercial fleet and mass transit markets in order to expand our customer base beyond the traditional law enforcement agencies. We have additional research and development projects that we anticipate will result in several new product launches in 2016. We believe that the launch of these new products will help to diversify and broaden the market for our product offerings.

We experienced operating losses for all of the quarters during 2015 and 2014. The following is a summary of our recent operating results on a quarterly basis:

	For the Three Months Ended:							
	December 31, 2015	September 30, 2015	June 30, 2015	March 31, 2015	December 31, 2014	September 30, 2014	June 30, 2014	March 31, 2014
Total revenue	\$5,051,119	\$5,096,088	\$5,634,237	\$4,248,764	\$5,419,611	\$4,666,713	\$3,449,754	\$ 3,908,341
Gross profit	1,563,647	2,039,774	3,092,194	1,653,740	3,211,532	2,461,933	1,928,389	2,320,939
Gross profit margin percentage	31.0%	40.0%	54.9%	38.9%	59.3%	52.8%	55.9%	59.4%
Total selling, general and administrative expenses	4,264,176	4,180,559	3,909,156	3,616,935	3,548,365	3,502,492	2,894,039	2,867,091
Operating income (loss)	(2,700,529)	(2,140,785)	(816,962)	(1,963,195)	(336,833)	(1,040,559)	(965,650)	(546,152)

Our business is subject to substantial fluctuations on a quarterly basis as reflected in the significant variations in revenues and operating results in the above table. These variations result from the timing of large individual orders and the traction gained by our new products, such as the FirstVU HD, MicroVU HD, FleetVU and DVM-800. We reported an operating loss of \$2,700,529 on revenues of \$5,051,119 for fourth quarter 2015 compared to an operating loss of \$2,140,785 on revenues of \$5,096,088 for third quarter 2015, an operating loss of \$816,962 on revenues of \$5,634,237 for second quarter 2015, and an operating loss of \$1,963,195 on revenues of \$4,248,764 for first quarter 2015. Our fourth quarter 2015 revenues decreased slightly from third quarter 2015. Our gross margin percentage decreased to 31.0% in the fourth quarter from 40.0% in the third quarter 2015 and 54.9% in the second quarter 2015. During the third quarter 2015, we decided to upgrade the connectors contained in the camera cable assembly on our FirstVU HD product to improve functionality and reliability. This upgrade was applied to all deployed units in the field as well as in our inventory, which required us to rework the camera assemblies and scrap a portion of the original cable assembly. Total scrap costs recognized in third and fourth quarter 2015 approximated \$1,615,000, which adversely affected our gross margins and other operating results. Management believes the

FirstVU HD connector upgrade implemented to all deployed units during the third and fourth quarter 2015 will resolve the cable assembly issue and that gross margins should return to more normal levels in future quarters. Our selling, general and administrative (“SG&A”) expenses were higher in the fourth quarter 2015 compared to the first three quarters of 2015. The primary reason for the increased SG&A expenses in the fourth quarter 2015 over the three prior quarters of 2015 was the addition of technical support staff to handle field inquiries and installation matters because our installed customer base has expanded and additional technical support staff required for our new products, such as the FirstVU HD and DVM-800. Many of our customers require extensive information technology infrastructure planning to manage and store the audio/video evidence gathered by our systems, which often requires new and larger data servers. Our international revenues during 2015 decreased to \$148,667 from \$961,763 in 2014.

There have been a number of factors and trends affecting our recent performance, which include:

- Revenues decreased in fourth quarter 2015 to \$5,051,119 from \$5,096,088 in third quarter 2015 and \$5,634,237 in second quarter 2015. We believe the decline in revenues in the fourth quarter 2015 and third quarter 2015 was attributable to a competitor, TASER International, Inc. (“Taser”) stating in one of its press releases that all the claims in one of our patents were determined to be “unpatentable.” We believe its press release was misleading and incorrect, causing confusion and concern in our marketplace, customer base and potential customers. Taser commenced an action in the United States Patent & Trademark Office (“USPTO”) for a reexamination of our U.S. Patent No. 8,781,292 (the “’292 Patent”). A reexamination is essentially a request that the USPTO review whether the patent should have issued in its present form in view of the “prior art,” e.g., other patents in the same technology field. The ’292 Patent relates to the “automatic trigger” that allows our body camera and our in-car system to automatically begin recording without the need for law enforcement officers to manually turn them on. The automatic trigger covered by our ’292 Patent is incorporated in our VuLink product. Such product has been popular and consequently the confusion and misinformation caused by our competitor has impacted our revenues of our VuLink product and body-worn and in-car systems. Ultimately, the USPTO rejected Taser’s efforts and reconfirmed the validity of the ’292 patent on January 16, 2016 and we have filed suit alleging willful patent infringement against Taser and included claims of commercial bribery and other unfair trade practices. See Litigation for details.
- Recognizing a critical limitation in law enforcement camera technology, during 2014 we pioneered the development of our VuLink ecosystem that provided intuitive auto-activation functionality as well as coordination between multiple recording devices. The USPTO has recognized these pioneering efforts by granting us multiple patents with claims covering numerous features, such as automatically activating an officer’s cameras when the light bar is activated or a data-recording device such as a smart weapon is activated. Additionally, Digital Ally’s patent claims cover automatic coordination between multiple recording devices. Prior to this work, officers were forced to manually activate each device while responding to emergency scenarios - a requirement that both decreased the usefulness of the existing camera systems and diverted officers’ attention during critical moments. We are seeing a trend in which law enforcement agencies have recognized the value of our VuLink technology and are seeking information on “auto-activation” features in requests for bids and requests for information involving the procurement process of body-worn cameras and in-car systems. We believe this trend may result in our patented VuLink technology becoming the de-facto “standard” for agencies engaged in deploying state-of-the-art body-worn and in-car camera systems. We expect that this technology will have a significant impact on our revenues in the long-term particularly if we are successful in our prosecution of the patent infringement litigation currently pending with Taser.
- We believe recently highly publicized law enforcement incidents have provided federal, state and municipal governments with an opportunity to reassess spending priorities, moving from the militarization of the police to increasing transparency and accountability. This underlying shift in priorities has redirected and increased law enforcement budgets and funding to our products and offerings. We are hopeful this trend continues into 2016 and beyond. In that regard, our FirstVU body-worn camera revenues increased to 20% of total 2015 revenues from 11% of revenues in 2014.
- We have launched additional products to complement our legacy in-car video products for law enforcement agencies in an effort to diversify our sources of revenue to new market channels. In that regard, we have expanded our product offerings to include incident recorders designed to meet commercial fleet owners’ needs. We believe these commercial fleet offerings will be appealing to prospective customers who want to

monitor, manage and train their drivers and to provide liability protection. Such fleet customers may include ambulance service providers, taxicab fleets, limousine services, off-premises airport parking services, over the road trucks and others who maintain a fleet of vehicles. We expect that our commercial fleet business will be a significant growth provider for us in the future. Revenues derived from our commercial business reached to 10% of total revenues in 2015 compared to 5% for 2014.

- Our gross margin percentage decreased to 31.0% in the fourth quarter 2015 from 40.0% in the third quarter, 54.9% in the second quarter and 38.9% in the first quarter of 2015. Our gross margin decline is primarily attributable to the camera cable connector upgrade implemented in the third and fourth quarter 2015 to our FirstVU HD product that caused us to rework our entire installed base of FirstVU HD's and scrap a portion of the original cable assembly. This upgrade contributed to total scrap costs approximating \$1,615,000 that adversely affected our fourth and third quarter 2015 gross margins. Management believes the FirstVU HD connector upgrade implemented to all deployed units during the third quarter and fourth quarter 2015 will resolve the cable assembly issue and that gross margins should return to more normal levels in future quarters.
- Our international revenues were less than expected for the year ends December 31, 2015 and 2014, with total international revenues of \$148,667 (1% of total revenues) for the year ended December 31, 2015 compared to \$961,763 (6% of total revenues) for the year ended December 31, 2014. Unfavorable changes in the foreign exchange rate in many countries have impacted our international sales. We were disappointed in our international revenues given the high level of bidding activity. We provided bids to a number of international customers; however, international sale cycles generally take longer than domestic business. We are hopeful that our new products will appeal to international customers, in particular the DVM-800 and FirstVU HD, although we can make no assurances in this regard.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet debt nor did we have any transactions, arrangements, obligations (including contingent obligations) or other relationships with any unconsolidated entities or other persons that may have material current or future effect on financial conditions, changes in the financial conditions, results of operations, liquidity, capital expenditures, capital resources, or significant components of revenue or expenses.

We are a party to operating leases, title sponsorship, and license agreements that represent commitments for future payments (described in Note 12 to our consolidated financial statements) and we have issued purchase orders in the ordinary course of business that represent commitments to future payments for goods and services.

For the Years Ended December 31, 2015 and 2014

Results of Operations

Summarized immediately below and discussed in more detail in the subsequent sub-sections is an analysis of our operating results for the years ended December 31, 2015 and 2014, represented as a percentage of total revenues for each respective year:

	Years Ended December 31,	
	2015	2014
Revenue	100%	100%
Cost of revenue	58%	43%
Gross profit	42%	57%
Selling, general and administrative expenses:		
Research and development expense	15%	17%
Selling, advertising and promotional expense	20%	19%
Stock-based compensation expense	8%	5%
General and administrative expense	37%	33%
Total selling, general and administrative expenses	80%	74%
Operating loss	(38%)	(17%)
Change in warrant derivative liabilities	2%	(26%)
Change in fair value of secured convertible notes payable	(22%)	(4%)
Secured convertible note payable issuance expenses	(1%)	(3%)
Other income and interest expense, net	(1%)	(3%)
Loss before income tax benefit	(60%)	(53%)
Income tax expense (benefit)	—%	—%
Net loss	(60%)	(53%)
Net loss per share information:		
Basic	\$ (2.77)	\$ (3.54)
Diluted	\$ (2.77)	\$ (3.54)

Revenues

Our current product offerings include the following:

Product	Description	Retail Price
DVM-500 Plus	An in-car digital audio/video system that is integrated into a rear view mirror primarily designed for law enforcement customers.	\$4,295
DVM-440 Ultra	An all-weather mobile digital audio/video system that is designed for motorcycle, ATV and boat users mirror primarily for law enforcement customers.	\$2,995
DVM-750	An in-car digital audio/video system that is integrated into a rear view mirror primarily designed for law enforcement customers.	\$4,995
MicroVU HD	A compact in-car digital audio/video system that records in high definition primarily designed for law enforcement customers. This system uses an internal fixed focus camera that records in high definition quality.	\$2,595
DVM-100	An in-car digital audio/video system that is integrated into a rear view mirror primarily designed for law enforcement customers. This system uses an integrated fixed focus camera.	\$1,895
DVM-400	An in-car digital audio/video system that is integrated into a rear view mirror primarily designed for law enforcement customers. This system uses an external zoom camera.	\$2,795
DVM-250 Plus	An in-car digital audio/video system that is integrated into a rear view mirror primarily designed for commercial fleet customers. We offer a web-based, driver management and monitoring analytics package for a monthly service fee that is available for our DVM-250 customers.	\$1,295
DVM-800	An in-car digital audio/video system that is integrated into a rear view mirror primarily designed for law enforcement customers. This system can use an internal fixed focus camera or two external cameras for a total of four video streams. We also offer the Premium Package which has additional warranty and retails for \$3,995.	\$3,495

Laser Ally	A hand-held mobile speed detection and measurement device that uses light beams rather than sound waves to measure the speed of vehicles.	\$1,995
FirstVU HD	A body-worn digital audio/video camera system primarily designed for law enforcement customers. We also offer a cloud based evidence storage and management solution for our FirstVU HD customers for a monthly service fee.	\$ 795
VuLink	An in-car device that enables an in-car digital audio/video system and a body worn digital audio/video camera system to automatically and simultaneously start recording.	\$ 495

We sell our products and services to law enforcement and commercial customers in the following manner:

- Sales to domestic customers are made directly to the end customer (typically a law enforcement agency or a commercial customer) through our direct sales force, comprised of our employees. Revenue is recorded when the product is shipped to the end customer.
- Sales to international customers are made through independent distributors who purchase products from us at a wholesale price and sell to the end user (typically law enforcement agencies or a commercial customer) at a retail price. The distributor retains the margin as its compensation for its role in the transaction. The distributor generally maintains product inventory, customer receivables and all related risks and rewards of ownership. Revenue is recorded when the product is shipped to the distributor consistent with the terms of the distribution agreement.
- Repair parts and services for domestic and international customers are generally handled by our inside customer service employees. Revenue is recognized upon shipment of the repair parts and acceptance of the service or materials by the end customer.

We may discount our prices on specific orders when considering the size of the order, the specific customer and the competitive landscape. We believe that our systems are cost competitive compared to our principal competitors and generally are lower priced when considering comparable features and capabilities.

Revenues for the years ended December 31, 2015 and 2014 were derived from the following sources:

	Years Ended December 31,	
	2015	2014
DVM-800	36%	40%
FirstVu HD and FirstVu	20%	11%
DVM-250 & DVM- 250 Plus	10%	5%
DVM-100 & DVM-400	8%	7%
DVM-500 Plus	7%	11%
VuLink	3%	1%
DVM-750	2%	4%
Laser Ally	—%	2%
Repair and service	3%	2%
Accessories and other revenues	11%	17%
	<u>100%</u>	<u>100%</u>

We experienced a change in the sales mix of our products for the year ended December 31, 2015 compared to the year ended December 31, 2014. Our newer products, the DVM-800 and the FirstVU HD, contributed 56% of total sales for the twelve months ended December 31, 2015, compared to 51% for the comparable period ending December 31, 2014. We expect the sales mix will continue to transition from our legacy DVM-500 Plus and DVM-750 product lines to the newer products during 2016. In addition, our commercial event recorders increased from 5% to 10% of total revenues. We expect this trend to continue because of the appeal of our new FleetVU driver management and monitoring tool.

Revenues for the years ended December 31, 2015 and 2014 were \$20,030,208 and \$17,444,419, respectively, an increase of \$2,585,789 (15%), due to the following factors:

- Our revenues increased significantly for the year ended December 31, 2015 compared to the year ended December 31, 2014 (15%). We believe the improvement is attributable to the increased attention to the benefits of video evidence caused by the civil unrest in Ferguson, Missouri and other cities in the United States and the features of our newer products. We have had a large increase in inquiries, test and evaluation units for our FirstVU and DVM-800 products in our pilot programs for prospective clients since the events in Ferguson, Missouri and elsewhere and are hopeful these will culminate in sales as the potential customers evaluate our body-worn and in-car video camera solutions. We believe that there has been a shift in buying patterns of our customers to emphasize our products because of the transparency and accountability they provide to the general public.
- We shipped twenty-two individual orders in excess of \$100,000, for a total of approximately \$3,727,000 in revenue for the year ended December 31, 2015 compared to six individual orders in excess of \$100,000, for a total of approximately \$2,500,000 in revenue for the year ended December 31, 2014. Eight of the large orders were for a package including our in-car video system, our FirstVU body worn camera and our patented VULink connectivity system. Additionally, six of the large orders were for our commercial event recorders and most of those orders included our FleetVu driver management and monitoring tool. Our average order size increased to approximately \$3,060 in the year ended December 31, 2015 from \$2,615 during the year ended September 30, 2014.
- The DVM-800 and FirstVU HD, introduced in 2013, contributed 56% of total sales for the year ended December 31, 2015, compared to 51% for the comparable period ending December 31, 2014. We expect the sales mix will continue to migrate from the DVM 500-Plus and DVM-750 product lines to the newer products in 2016.
- Our international revenues decreased to \$148,667, representing 1% of total revenues, during the year ended December 31, 2015 compared to \$961,763, representing 6% of total revenues, during the year ended December 31, 2014. Our international revenues during 2015 were negatively impacted by the unfavorable foreign currency exchange rates for our international customers. In particular the Mexican peso exchange rate deterioration has delayed purchases by several of our largest customers and opportunities. We were disappointed in our international revenues given the high level of bidding activity. We have provided bids to a number of international customers; however, international sale cycles generally take longer than domestic business. We also believe that our new products may appeal to international customers, in particular the DVM-800 and FirstVU HD, although we can make no assurances in this regard.

Cost of Revenue

Cost of revenue on units sold for the year ended December 31, 2015 and 2014 was \$11,680,853 and \$7,521,626, respectively, an increase of \$4,159,227 (55%). The increase in cost of goods sold is partially due to the 15% increase in revenues. In addition, we encountered printed circuit board issues in our FirstVU HD body-worn cameras early in 2015 and in response upgraded the entire installed base of FirstVUs in the third and fourth quarter 2015. The upgrade involved the replacement of a connector contained in the camera cable assembly on our FirstVU HD product that dramatically increased rework and scrap rates on our FirstVU HD. Our scrap costs were approximately \$1,615,000 for third and fourth quarter 2015. We also increased our inventory reserve in 2015 due to changes in the sales mix to the DVM-800 platform, which has resulted in a higher level of excess component parts of older versions of our legacy products. Cost of sales as a percentage of revenues increased to 58% during the year ended December 31, 2015 compared to 43% for the year ended December 31, 2014. We believe that the FirstVU HD connector upgrade implemented to all deployed units during the third and fourth quarter 2015 will resolve the cable assembly issue and that gross margins should return to more normal levels in 2016. Our goal is to maintain cost of sales as a percentage of revenues at 40% or less during 2016. We expect that our newer product offerings, in particular the DVM-800, VuLink and FirstVU HD, should improve our cost of goods sold as a percentage of sales in the longer term. We do not expect to incur significant capital expenditures to ramp up production of our current products because our internal process is largely assembling subcomponents, testing and shipping of completed products or we use contract manufacturers. We rely on our subcontractors to produce finished circuit boards that represent the primary components of our products, thereby reducing our need to purchase capital equipment.

We had \$1,202,411 and \$600,578 in reserves for obsolete and excess inventories at December 31, 2015 and December 31, 2014, respectively. Total raw materials and component parts were \$3,833,873 and \$2,987,124 at December 31, 2015 and December 31, 2014, respectively, an increase of \$846,749 (28%). The increase in raw

materials and component parts is primarily attributable to our forecasts of sales for the FirstVU HD, and VuLink and the need to secure long lead component inventory items in advance of production. Finished goods balances were \$7,895,663 and \$6,576,480 at December 31, 2015 and December 31, 2014, respectively, an increase of \$1,319,183 (20%). The increase in finished goods was primarily for the DVM-750 product for anticipated international customer orders and additional cameras for our various products. Finished goods at December 31, 2015 consist primarily of the Laser Ally products and our DVM-500 Plus and DVM-750 products for expected orders. The increase in the inventory reserve is primarily due to the change in sales mix of our products which has resulted in a higher level of excess component parts of the older versions of our legacy products. We believe the reserves are appropriate given our inventory levels at December 31, 2015.

Gross Profit

Gross profit for the years ended December 31, 2015 and 2014 was \$8,349,355 and \$9,922,793, respectively, a decrease of \$1,573,438 (16%). The decrease is a result of the cost of sales as a percentage of revenues increasing to 58% during the year ended December 31, 2015 from 43% for the year ended December 31, 2014 offset by the 15% increase in sales for the year ended December 31, 2015. Our goal is to improve our margins to 60% over the longer term based on the expected margins of our newer products, in particular the DVM-800 and FirstVU HD, as they continue to gain traction in the marketplace and we increase commercial production in 2016. In addition, as revenues increase from these products, we will seek to further improve our margins from them through economies of scale and more efficiently utilizing fixed manufacturing overhead components. We plan to continue our initiative on more efficient management of our supply chain through outsourcing production, quantity purchases and more effective purchasing practices.

Selling, General and Administrative Expenses

Selling, general and administrative expenses were \$15,970,826 and \$12,811,987 for the years ended December 31, 2015 and 2014, respectively, an increase of \$3,158,839 (25%). Selling, general and administrative expenses as a percentage of sales increased to 80% in 2015 from 74% in 2014.

The significant components of selling, general and administrative expenses are as follows:

	Years Ended December 31,	
	2015	2014
Research and development expense	\$ 2,980,807	\$ 2,905,407
Selling, advertising and promotional expense	3,965,400	3,340,764
Stock-based compensation expense	1,623,033	834,593
Professional fees and expense	1,368,758	1,153,985
Executive, sales, and administrative staff payroll	2,941,151	2,012,552
Other	3,091,677	2,564,686
Total	\$ 15,970,826	\$ 12,811,987

Research and development expense. We continue to focus on bringing new products to market, including updates and improvements to current products. Our research and development expenses totaled \$2,980,807 and \$2,905,407 for the years ended December 31, 2015 and 2014, respectively, an increase of \$75,400 (3%). We employed a total of 25 engineers at December 31, 2015 compared to 22 engineers at December 31, 2014, most of whom are dedicated to research and development activities for new products. We are increasing our engineering staff of web-based developers as we expand our offerings to include cloud-based evidence storage and management for our law enforcement customers (VuVault.net) and our web-based commercial fleet driver monitoring and management tool (FleetVU). Research and development expenses as a percentage of total revenues were 15% in 2015 compared to 17% in 2014. We have active research and development projects on several new products, as well as upgrades to our existing product lines. We consider our research and development capabilities and new product focus to be a competitive advantage and will continue to invest in this area on a prudent basis.

Selling, advertising and promotional expenses. Selling, advertising and promotional expense totaled \$3,965,400 and \$3,340,764 for the years ended December 31, 2015 and 2014, respectively, an increase of \$624,636 (19%). Salaries and commissions to our sales personnel represent the primary components of these costs and were \$3,116,729 and \$2,729,589 for the years ended December 31, 2015 and 2014, respectively, an increase of \$387,140

(14%), which is commensurate with our 15% increase in revenues. The effective commission rate was 15.6% for the years ended December 31, 2015 and 2014, respectively.

Promotional and advertising expenses totaled \$848,671 during the year ended December 31, 2015 compared to \$611,175 during the year ended December 31, 2014, an increase of \$237,496 (39%). The increase is primarily attributable to the Company becoming the title sponsor of the Web.com Tour golf tournament held annually in the Kansas City Metropolitan area. Our net promotional expense related to sponsorship of the 2015 tournament totaled \$172,623. Additionally, we had increased participation in trade shows and media advertising in trade publications and other marketing initiatives designed to help penetrate commercial markets for our DVM-250 Plus event recorders, and to increase awareness of our FirstVU HD, MicroVu HD, VuLink and the DVM-800 within our law enforcement channel during 2015.

Stock-based compensation expense. Stock based compensation expense totaled \$1,623,033 and \$834,593 for the years ended December 31, 2015 and 2014, respectively, an increase of \$788,440 (94%). The increase is primarily due to the amortization of the restricted stock granted during 2015 to our officers, directors, and other employees that had the effect of increasing the stock compensation expense for the year ended December 31, 2015 compared to 2014. The total number of restricted shares granted and our market stock price was higher on the specific dates of the 2015 stock grants compared to previous years, which increased the grant date fair value attributable to the restricted stock grants.

The total number of restricted shares granted to the Board of Directors, officers and employees increased to 326,500 shares during the year ended December 31, 2015 as compared to 192,500 shares during the year ended December 31, 2014. In addition, the weighted average grant date price of the shares increased to \$8.42 per share compared to \$5.33 per share during the year ended December 31, 2014.

Professional fees and expense. Professional fees and expenses totaled \$1,368,758 and \$1,153,985 for the years ended December 31, 2015 and 2014, respectively, an increase of \$214,773 (19%). Professional fees during 2014 and 2015 were related primarily to normal public company matters, intellectual property matters and litigation matters. The increase in professional fees and expenses in 2015 compared to 2014 is primarily attributable to higher accounting fees and litigation expenses related to the Utility and Taser matters. See Litigation for further discussion.

Executive, sales and administrative staff payroll. Executive, sales and administrative staff payroll expenses totaled \$2,941,151 and \$2,012,552 for the years ended December 31, 2015 and 2014, respectively, an increase of \$928,599 (46%). This increase is primarily attributable to the hiring of additional technical support staff to handle field inquiries and installation matters because our installed customer base has expanded and the need for additional technical support staff for our new products, such as the DVM-800, FirstVU HD, VuVault.com and FleetVU. In addition, the Company established a bonus plan during 2015, which resulted in approximately \$260,000 in compensation expense and the Company incurred an increase of approximately \$250,000 in employee-based retention expenses.

Other. Other selling, general and administrative expenses totaled \$3,091,677 and \$2,564,686 for the years ended December 31, 2015 and 2014, respectively, an increase of \$526,991 (21%). The increase in other expenses in 2015 compared to 2014 is primarily attributable to increased consulting, contract labor and insurance expenses. We are utilizing consultants to help develop engineering and manufacturing standard processes with a goal of achieving ISO 13485, ISO 9001, FDA cGMPs, and MD Directive 93/42/EEC certifications. We also utilized consultants to help design, develop and launch a new corporate website in 2015.

Operating Loss

For the reasons previously stated, our operating loss was \$7,621,471 and \$2,889,194 for the years ended December 31, 2015 and 2014, respectively, a deterioration of \$4,732,277 (164%). Operating loss as a percentage of revenues increased to 38% in 2015 from 17% in 2014.

Interest Income

Interest income increased to \$21,156 for the year ended December 31, 2015 from \$13,660 in 2014. The increase is attributable to an increase in average cash and cash equivalents balances related to our \$12.0 million registered direct offering which was completed in July 2015.

Change in Warrant Derivative Liabilities

Detachable warrants to purchase a total of 398,916 common shares, as adjusted, were issued in conjunction with the Secured Convertible Notes (“Secured Convertible Notes”) during March and August 2014. The warrants were required to be treated as derivative liabilities because of their anti-dilution and down-round provisions. Accordingly, we estimated the fair value of such warrants as of their respective date of issuance and record a corresponding derivative liability in the balance sheet. Upon exercise of the warrants we recognized a gain/loss based on the closing market price of the underlying common stock on the date of exercise. In addition, the warrant derivative liability is adjusted to the estimated fair value of any unexercised warrants as of December 31, 2015 and 2014.

The holder of the Secured Convertible Notes exercised a portion of such warrants in August 2014 and in September 2014 with the change in value of the warrant derivative totaling \$3,233,068 being recognized as a non-cash charge to operations during the year ended December 31, 2014 representing the increase in our stock price over the exercise price at the respective exercise dates. The changes in the fair value of the warrant derivatives related to unexercised warrants totaled \$1,193,694 for the year ended December 31, 2014. The change in warrant derivative liabilities totaled \$4,426,762 for the year ended December 31, 2014 and the warrant derivative liability balance was \$2,186,214 as of December 31, 2014.

The holder of the Secured Convertible Notes exercised a portion of its warrants in March 2015 and April 2015 with the change in value of the warrant derivative through the date of exercise resulting in a gain of \$336,373 compared to the estimated warrant derivative liability balance. The resulting derivative balance of \$1,748,155 was offset against the warrant derivative liability during the year ended December 31, 2015. The changes in the fair value of the warrant derivatives related to unexercised warrants resulted in a gain of \$34,633 for the year ended December 31, 2015. The change in warrant derivative liabilities resulted in a gain of \$371,006 for the year ended December 31, 2015 and the warrant derivative liability balance was \$67,053 as of December 31, 2015.

Change in Fair Value of Secured Convertible Notes Payable

We elected to account for and record the Secured Convertible Notes on their fair value basis. The holder of the Secured Convertible Notes exercised its right to convert such notes to 316,716 common shares during July 2014 through September 2014. The change in fair market value of the Secured Convertible Notes associated with the conversion of debt was \$384,614 during the year ended December 31, 2014, representing the increase in our stock price over the conversion price as of the respective conversion dates. On December 4, 2014, the holder of the Secured Convertible Note exercised its right to convert \$36,600 principal amount into 6,000 shares of our common stock at the conversion price of \$6.10 per share. The increase in fair market value of these 6,000 shares over the \$36,600 principal retired was \$89,400, representing the increase in our stock price over the conversion price as of the conversion date. As of December 31, 2014 the fair market value of the remaining Secured Convertible Note was \$3,273,431 representing a change in fair market value for the year ended December 31, 2014 totaling \$302,552. Accordingly, the total change in fair value of the two Secured Convertible Notes payable was \$776,566 for the year ended December 31, 2014.

The holder of the Secured Convertible Notes exercised its right to convert the remaining principal balance of such Notes into 655,738 shares of common stock and 5,475 shares for accrued interest thereon at a conversion price of \$7.32 per share in separate transactions between February 13 and 25, 2015. The increase in fair market value of the 655,213 shares over the \$3,963,780 principal retired was \$4,434,383, representing the increase in our stock price over the conversion price as of the conversion dates. Accordingly, the total change in fair value of the Secured Convertible Notes payable was a \$4,434,383 loss for the year ended December 31, 2015, which was recognized in the Consolidated Statement of Operations.

Secured Convertible Notes Issuance Expenses

We elected to account for and record our Secured Convertible Notes on a fair value basis. Accordingly, we were required to expense the related issuance costs to other expense which totaled \$93,845 and \$579,066 for the years ended December 31, 2015 and 2014, respectively. The 2015 expenses were attributable to the proxy costs incurred for our Special Meeting of Shareholders held on February 13, 2015 to approve the issuance of shares above the Nasdaq Share Cap in connection with the issuance of the Secured Convertible Note in August 2014. The December 31, 2014 expenses included a \$360,000 placement agent fee and the remainder was primarily legal fees.

Other Income (Expense)

Other income increased to \$1,878 for the year ended December 31, 2015 from (\$5,589) in 2014.

Interest Expense

We incurred interest expense of \$282,233 and \$499,744 during the years ended December 31, 2015 and 2014, respectively, a decrease of \$217,511 (44%). We issued an aggregate of \$2.5 million principal amount of subordinated notes during 2011, which bore interest at the rate of 8% per annum until the notes were paid in full on July 24, 2015. On March 24, 2014, we issued the \$2.0 million Secured Convertible Note that remained outstanding until its full conversion in three separate tranches between July 1, 2014 and September 19, 2014. On August 28, 2014, we issued the \$4.0 million Secured Convertible Note bearing interest at the rate of 6% per annum that remained outstanding until its full conversion in eight separate tranches between February 13, 2015 and February 25, 2015.

We amortized to interest expense \$55,187 and \$132,447, representing the discount associated with the \$2.5 million subordinated note during years ended December 31, 2015 and 2014, respectively. The total remaining unamortized discount was \$0 and \$55,187 at December 31, 2015 and 2014, respectively.

Loss before Income Tax Benefit

As a result of the above, we reported a loss before income tax benefit of \$12,037,892 and \$9,163,261 for the years ended December 31, 2015 and 2014, respectively, a deterioration of \$2,874,631 (31%).

Income Tax Benefit

We did not record an income tax benefit related to our losses for the years ended December 31, 2015 and 2014, respectively, due to our overall net operating loss carryforwards available. We have further determined to continue providing a full valuation reserve on our net deferred tax assets as of December 31, 2015. During 2015, we increased our valuation reserve on deferred tax assets by \$5,413,000 whereby our deferred tax assets continue to be fully reserved due to our recent operating losses.

We had approximately \$30,700,000 of net operating loss carryforwards and \$1,747,000 of research and development tax credit carryforwards as of December 31, 2015 available to offset future net taxable income.

Net Loss

As a result of the above, we reported net losses of \$12,037,892 and \$9,163,261 for the years ended December 31, 2015 and 2014, respectively, a deterioration of \$2,874,631 (31%).

Basic and Diluted Loss per Share

The basic and diluted loss per share was \$2.77 and \$3.54 for the years ended December 31, 2015 and 2014, respectively, for the reasons previously noted. All outstanding stock options were considered antidilutive and therefore excluded from the calculation of diluted loss per share for the years ended December 31, 2015 and 2014 because of the net loss reported for each period.

Liquidity and Capital Resources

Overall:

During 2011, we borrowed a total of \$2.5 million under an unsecured credit facility with a private, third-party lender. The \$2.5 million of subordinated notes bore interest at the rate of 8% per annum and are payable interest only on a monthly basis. The subordinated notes were subordinated to all existing and future senior indebtedness; as such term is defined in the Notes. On December 4, 2013, we entered into an agreement with the lender that extended the maturity dates of the subordinated notes from May 30, 2014 to May 30, 2015, which was later extended to August 15, 2015. The subordinated notes were unsecured and did not prevent us from obtaining new senior secured

financings. On July 24, 2015, we paid the entire \$2.5 million of outstanding principal together with all accrued interest in full.

On March 24, 2014, we completed a private placement of the \$2.0 million Secured Convertible Note, which bore interest at 6% per annum, payable quarterly, and was secured by all of our assets. In addition, we issued the holder detachable warrants to acquire 130,000 shares of common stock at \$10.00 per share (the "March 2014 Warrant"). On July 10, 2014 we and the holder of the \$2.0 million Secured Convertible Note entered into an agreement under which we reduced the conversion price of the Senior Secured Note to \$6.25 per share during the period from July 11 to July 14, 2014. During the foregoing period the holder converted \$1,777,778 principal amount and \$2,963 accrued interest on the Secured Convertible Note into 284,928 shares of our common stock. On July 15, 2014 the conversion price returned to \$8.55 per share. The holder of the \$2.0 million Secured Convertible Note exercised its right to convert the remaining outstanding principal into 26,263 shares of common stock in two separate tranches on August 28, 2014 and September 19, 2014. In addition, the holder exercised its warrant to purchase 130,000 shares of common stock resulting in cash proceeds of \$951,600 during 2014 and utilized the cashless exercise feature for the remaining 6,621 shares.

On August 28, 2014, we completed a second private placement to the holder of the \$2.0 million Secured Convertible Note and issued the \$4.0 million Secured Convertible Note, which bore interest at 6% per annum, payable quarterly, and was secured by all assets of the Company. Principal payments were not required until the sixth month after origination and continued ratably for the remaining 18-month term. The principal and interest payments could be made through the payment of cash or in-kind by transferring unrestricted and fully registered shares in an amount equivalent to 80% of the volume weighted average trading price for the 20 consecutive trading days preceding the payment date. The \$4.0 million Secured Convertible Note was convertible into shares of common stock at the holder's option at a conversion price of \$6.10 per share at any time it was outstanding. In addition, we could force conversion if the market price exceeded \$12.20 per share for 20 consecutive trading days. In connection with the second private placement we issued a warrant exercisable to purchase 262,295 shares of common stock at \$7.32 per share (the "August Warrant"), which was exercisable immediately and expires August 28, 2019.

On December 4, 2014, the holder of the \$4.0 million Secured Convertible Note converted \$36,600 of principal into 6,000 shares of common stock and in February 2015 the holder exercised its conversion rights on the remaining principal and accrued interest balances in exchange for an additional 655,213 shares of common stock. The \$4.0 million Secured Convertible Note and August Warrant contained anti-dilution provisions and restricted the incurrence of additional secured indebtedness. We paid a placement agent fee of \$240,000 and approximately \$101,500 of other third party costs in connection with the transaction, which included legal fees. We used the funds generated by this credit facility to provide the working capital for our operations in 2015.

In connection with the anti-dilution provisions of the March 2014 Warrant, the Company was required to increase the number of shares to be issued upon the exercise of the March 2014 Warrant to 136,621 from 100,000 and to reduce the exercise price to \$7.32 from \$10.00 per share in connection with the August 2014 private placement.

In accordance with the terms of the \$4.0 million Secured Convertible Note we were required to maintain minimum cash balance of not less than \$1.5 million until such time as we satisfied all of the "Equity Conditions," as defined in the \$4.0 million Secured Convertible Note. Such Equity Conditions included our shareholders approving the issuance of shares above the Nasdaq Share Cap. The \$1.5 million minimum cash balance was reported as restricted cash separate from cash and cash equivalents in the consolidated balance sheet as of December 31, 2014. On February 13, 2015, the shareholders approved the issuance of shares above the Nasdaq Share Cap, thereby releasing the restriction on the cash balances.

Between February 13 and 25, 2015 the holder of the \$4.0 million Secured Convertible Note exercised its right to convert the remaining principal on the \$4.0 million Secured Convertible Note into 655,738 shares of common stock and 5,475 shares for accrued interest at the conversion price of \$7.32 per share. In addition, the holder also exercised part of its August Warrant to purchase 212,295 shares of common stock resulting in cash proceeds of \$1,553,999 during first quarter 2015. The holder exercised part of its August Warrant to purchase 37,800 shares resulting in cash proceeds of \$276,690 during second quarter 2015. Warrants to purchase a total of 12,200 common shares for \$7.32 remain outstanding as of December 31, 2015.

On July 22, 2015, we closed a \$12.0 million offering of our common stock and common stock purchase warrants in an at-the-market registered direct offering and a concurrent private placement of two series of common stock purchase warrants with two investors. At the closing we sold an aggregate of 879,766 shares of our common stock at a per share price of \$13.64 in a registered direct offering to the investors. We also issued a registered short-term warrant to the investors exercisable to purchase a total of 437,086 shares of common stock in such offering. Additionally, in a concurrent private placement, we issued to the investors short-term warrants exercisable to purchase a total of 222,738 shares of common stock and long-term warrants exercisable to purchase a total of 879,766 shares of common stock. Both the short-term registered and private placement warrants are immediately exercisable, have an exercise price of \$13.43 per share and expire 24 months from the date of issuance. The long-term warrants are immediately exercisable, have an exercise price of \$13.43 per share and expire five and one-half years from the date of issuance. After placement agent fees and other estimated offering expenses, the net offering proceeds to us totaled approximately \$11.2 million prior to any exercise of the warrants. The warrants issued in this transaction did not contain terms that would require us to record derivative warrant liabilities that could affect our financial statements. Proceeds of the offering were used to repay the \$2.5 million principal amount of subordinated notes plus accrued interest in full and for working capital purposes.

After completion of the \$12.0 million offering on July 22, 2015 and the payment of the \$2.5 million principal amount of subordinated notes, we believe we have sufficient liquidity to support our operations for 2016. In addition, if the need arises, we may seek commercial credit facilities including traditional bank borrowings to improve our liquidity position and to finance growth opportunities or future capital needs that may arise.

We have warrants outstanding to purchase 1,599,290 shares of common stock at a weighted average exercise price \$13.25 per share outstanding as of December 31, 2015. In addition, there are common stock purchase options outstanding covering 328,690 shares at an average price of \$20.43 per share. The exercise of these common stock equivalents would provide us with an additional potential source of liquidity.

We had \$6,924,079 of available cash and equivalents and net working capital of approximately \$18.7 million as of December 31, 2015. Net working capital as of December 31, 2015 includes approximately \$3.4 million of accounts receivable and \$10.7 million of inventory.

Cash and cash equivalents balances: As of December 31, 2015, we had cash and cash equivalents with an aggregate balance of \$6,924,079, an increase from a balance of \$3,049,716 at December 31, 2014. Summarized immediately below and discussed in more detail in the subsequent subsections are the main elements of the \$3,874,363 net increase in cash during the year ended December 31, 2015:

- **Operating activities:** **\$7,686,769** of net **cash used in** operating activities. Net cash used in operating activities was \$7,686,769 and \$3,172,812 for the year ended December 31, 2015 and 2014, respectively, a deterioration of \$4,513,957. The deterioration was primarily the result of our net loss, increases in inventory and decreases in accounts payable offset by increases in deferred revenue and non-cash charges for stock based compensation and fair value changes on debt. Our goal is to increase revenues, return to profitability and decrease our inventory levels during 2016, thereby providing positive cash flows from operations, although there can be no assurances that we will be successful in this regard.
- **Investing activities:** **\$881,047** of net **cash provided by** investing activities. Cash provided by investing activities was \$881,047 for the year ended December 31, 2015 compared to cash used in investing activities of \$1,348,319 for the year ended December 31, 2014. In connection with the \$4.0 million Secured Convertible Note issued in August 2014, we were required to maintain a minimum cash balance of not less than \$1.5 million until we satisfied all of the “Equity Conditions,” as defined in the \$4.0 million Secured Convertible Note (see Note 7). We satisfied the “Equity Conditions” on February 13, 2015, the restriction on the \$1.5 million was lifted and the funds became available for working capital needs. In 2015, we replaced and upgraded our internal servers and infrastructure including upgrades to our enterprise software. In 2014 and 2015, we incurred costs for patent applications on our proprietary technology utilized in our new products and included in intangible assets.

- Financing activities:** **\$10,680,085** of net cash provided by financing activities. Cash provided by financing activities was \$10,680,085 and \$7,115,869 for the years ended December 31, 2015 and 2014, respectively. On July 22, 2015 we closed a \$12.0 million offering of our common stock and common stock purchase warrants. After placement agent fees and other estimated offering expenses, the net offering proceeds to us totaled approximately \$11.2 million prior to any exercise of the warrants. Proceeds of the offering were used to repay the \$2.5 million principal amount of the subordinated notes. We received \$2,133,889 of proceeds in the year ended December 31, 2015 from the exercise of common stock warrants and options. On March 24, 2014, we issued the \$2.0 million Secured Convertible Note, the proceeds of which were used for general working capital purposes. On August 25, 2014 we issued the \$4.0 million Secured Convertible Note. We paid \$93,845 and \$579,066 of debt issuance costs in the years ended December 31, 2015 and 2014, respectively, related to the \$2.0 and \$4.0 million Secured Convertible Notes. During 2015 we acquired capital equipment financed through capital lease obligations and payments on such obligations represented the cash used in financing activities.

The net result of these activities was an increase in cash of \$3,874,363 to \$6,924,079 for the year ended December 31, 2015.

Commitments:

We had \$6,924,079 of cash and cash equivalent balances and net positive working capital approximating \$18.7 million as of December 31, 2015. Accounts receivable balances represented \$3,368,909 of our net working capital at December 31, 2015. We intend to collect our outstanding receivables on a timely basis and reduce the overall level during 2016, which would help to provide positive cash flow to support our operations during 2016. Inventory represented \$10,661,766 of our net working capital at December 31, 2015 and finished goods represented \$7,895,663 of total inventory. We are actively managing the level of inventory and our goal is to reduce such levels during 2016 by our sales activities, which should provide additional cash flow to help support our operations during 2016.

Capital Expenditures. We had no material commitments for capital expenditures at December 31, 2015.

Lease commitments-Operating Leases. We have a long-term operating lease agreement for office and warehouse space that expires in April 2020. We have also entered into month-to-month leases for equipment and facilities. Rent expense for the years ended December 31, 2015 and 2014 was \$401,845 and \$398,624, respectively, related to these leases. Following are our minimum lease payments for each year and in total.

Year ending December 31:	
2016	\$ 439,707
2017	445,449
2018	451,248
2019	457,327
2020	154,131
	<u>\$ 1,974,862</u>

License agreements. We have several license agreements under which we have been assigned the rights to certain licensed materials used in our products. Certain of these agreements require us to pay ongoing royalties based on the number of products shipped containing the licensed material on a quarterly basis. Royalty expense related to these agreements aggregated \$26,454 and \$27,053 for the years ended December 31, 2015 and 2014, respectively.

Following is a summary of our licenses as of December 31, 2015:

License Type	Effective Date	Expiration Date	Terms
Production software license agreement	April 2005	April 2016	Automatically renews for one-year periods unless terminated by either party.
Software sublicense agreement	October 2007	October 2016	Automatically renews for one-year periods unless terminated by either party.
Media analytics	June 2015	May 2016	Either party may unilaterally terminate this agreement by written notice to the other party.

Supply and distribution agreement.

We entered into a supply and distribution agreement with Dragoneye on May 1, 2010 under which it was granted the exclusive world-wide right to sell and distribute a proprietary law enforcement speed measurement device and derivatives to its customers. The term of the agreement was 42 months after the date Dragoneye began full scale production of the product, which commenced in August 2010 and final certification of the product was obtained. The agreement had minimum purchase requirements of 1,000 units per period over three commitment periods. On January 31, 2012, the agreement was amended to reduce the minimum purchase commitment over the second and third years by 52% of the original commitment. We agreed to release our world-wide right to exclusively market the product to the law enforcement community in exchange for the reduction in the purchase commitment.

The agreement originally required minimum order quantities that represent a remaining unfulfilled commitment to acquire \$634,680 of product as of December 31, 2014. Dragoneye is responsible for all warranty, damage or other claims, losses or liabilities related to the product and is obligated to defend and indemnify us against such risks. We held approximately \$1,318,000 of such products in finished goods inventory as of December 31, 2015 and had sold approximately 1,010 units since the beginning of the agreement through December 31, 2015.

We filed a lawsuit on June 15, 2013 against Dragoneye for breaching the contract and participated in a mediation of the lawsuit on August 12, 2015 that resulted in a settlement on August 25, 2015. The settlement includes the repair of all LaserAlly units we currently hold and future customer returned units exhibiting the same failure. See “Litigation” below for further details.

Litigation.

We are subject to various legal proceedings arising from normal business operations. Although there can be no assurances, based on the information currently available, we believe that it is probable that the ultimate outcome of each of the actions will not have a material adverse effect on our consolidated financial statements. However, an adverse outcome in certain of the actions could have a material adverse effect on our financial results in the period in which it is recorded.

On June 5, 2013, we filed a lawsuit in the District Court of Johnson County, Kansas against Dragoneye. We had entered into a supply and distribution agreement with Dragoneye on May 1, 2010 under which we were granted the right to sell and distribute a proprietary law enforcement speed measurement device and derivatives to our customers under the trade name LaserAlly. The parties amended the agreement on January 31, 2012. In our complaint we alleged that Dragoneye breached the contract because it failed to maintain as confidential information our customer list; it infringed on our trademarks, including LaserAlly and Digital Ally; it tortiously interfered with our existing contracts and business relationships with our dealers, distributors, customers and trading partners; and it engaged in unfair competition and violated the Kansas Uniform Trade Secrets Statutes. We amended the complaint to include claims regarding alleged material defects in the products supplied under the agreement. We participated in a mediation of the lawsuit on August 12, 2015 and agreed to an omnibus resolution of the matter. The settlement included the return of and repair free of charge of all LaserAlly units we held and future customer returned units exhibiting the same or similar failure. Dragoneye was allowed no more than 120 days from October 1, 2015 to repair all units, upgrade all units to current firmware release and to re-certify the units. We will remit the unpaid balance of approximately \$191,000 (\$91,684.47 remaining at December 31, 2015) currently recorded in accounts payable

to Dragoneye in five payments concurrent with the repair and return of units by Dragoneye. Furthermore, all of the remaining minimum contractual purchase requirements were voided. On August 25, 2015, the judge approved the parties' joint stipulation of dismissal with prejudice, which finalized the settlement.

On October 25, 2013, we filed a complaint in the United States District Court for the District of Kansas to eliminate threats by a competitor, Utility Associates, Inc. ("Utility"), of alleged patent infringement regarding U.S. Patent No. 6,831,556 (the " '556 patent"). Specifically, the lawsuit seeks a declaration that our mobile video surveillance systems do not infringe any claim of the '556 patent. We became aware that Utility had mailed letters to current and prospective purchasers of our mobile video surveillance systems threatening that the use of such systems purchased from third parties not licensed to the '556 patent would create liability for them for patent infringement. We reject Utility's assertion and will vigorously defend the right of end-users to purchase such systems from providers other than Utility. The United States District Court for the District of Kansas dismissed the lawsuit because it decided that Kansas was not the proper jurisdictional forum for the dispute. The District Court's decision was not a ruling on the merits of the case. We appealed the decision and the Federal Circuit affirmed the District Court's previous decision.

In addition, we began proceedings to invalidate the '556 patent through a request for inter partes review of the '556 patent at the United States Patent and Trademark Office ("USPTO"). On July 27, 2015, the USPTO invalidated key claims in Utility's '556 Patent. The Final Decision from the USPTO significantly curtails Utility's ability to threaten law enforcement agencies, municipalities, and others with infringement of the '556 Patent. Utility has appealed this decision to the United States Court of Appeals for the Federal Circuit. Briefs have not yet been filed and no schedule for oral argument has been issued. We believe Utility will have a difficult time convincing the appellate court to overturn the decision of the USPTO.

On June 4, 2014 we filed an Unfair Competition lawsuit against Utility Associates, Inc. ("Utility") in the United States District Court for the District of Kansas. In the lawsuit we contend that Utility has defamed us and illegally interfered with our contracts, customer relationships and business expectancies by falsely asserting to our customers and others that our products violate the '556 Patent, of which Utility claims to be the holder.

Our suit also includes claims against Utility for tortious interference with contract and violation of the Kansas Uniform Trade Secrets Act, arising out of Utility's employment of one of our employees, in violation of that employee's Non-Competition and Confidentiality agreements with us. In addition to damages, we are seeking temporary, preliminary, and permanent injunctive relief, prohibiting Utility from, among other things, continuing to threaten or otherwise interfere with our customers. On March 4, 2015, an initial hearing was held upon our request for injunctive relief.

Based upon facts revealed at the March 4, 2015 hearing, on March 16, 2015, we sought leave to amend our Complaint in the Kansas suit to assert additional claims against Utility. Those new claims include claims of actual or attempted monopolization, in violation of § 2 of the Sherman Act, claims arising under a new Georgia statute that prohibits threats of patent infringement in "bad faith," and additional claims of unfair competition/false advertising in violation of § 63(a) of the Lanham Act. As these statutes expressly provide, we are seeking treble damages, punitive damages and attorneys' fees, as well as injunctive relief. The Court concluded its hearing on April 22, 2015, and allowed us leave to amend our complaint, but denied our preliminary injunction. The case is now in the discovery stage. However, we believe that the USPTO's final decision issued on July 27, 2015 will provide us with substantial basis to pursue our claims either through court trial or by summary judgment motions. We intend to pursue recovery from Utility, its insurers and other parties, as appropriate.

On June 13, 2014, Utility filed suit in the United States District Court for the Northern District of Georgia against us alleging infringement of the '556 patent. The suit was served on us on June 20, 2014. As alleged in our first filed lawsuit described above, we believe the '556 patent is both invalid and not infringed. Further, the USPTO issued its final decision invalidating 23 of the 25 claims asserted in the '556 Patent, as noted above. We believe that the suit filed by Utility is without merit and we will vigorously defend the claims asserted against us. An adverse resolution of the foregoing litigation or patent proceedings could have a material adverse effect on our business, prospects, results of operations, financial condition, and liquidity. The Court stayed all proceedings with respect to this lawsuit pending the outcome of the patent review performed by the USPTO and the appellate court. Based on the USPTO's final decision to invalidate substantially all claims contained in the '556 patent, we intend to file for summary judgment in our favor if Utility does not request outright dismissal.

The Company received notice in April 2015 that TASER International, Inc. (“Taser”), one of our competitors, had commenced an action in the USPTO for a re-examination of our U.S. Patent No. 8,781,292 (“the ‘292 Patent”). A re-examination is essentially a request that the USPTO review whether the patent should have issued in its present form in view of the “prior art,” e.g., other patents in the same technology field. The prior art used by Taser to request the re-examination is a patent application (which never issued into a patent) assigned to an unrelated third party and was not the result of any of Taser’s own research and development efforts.

Our ‘292 Patent is directed to a system that determines when a recording device, such as a law enforcement officer’s body camera or in-car video recorder, begins recording and automatically instructs other recording devices to begin recording. The technology described in the ‘292 Patent is incorporated in our VuLink product.

On August 17, 2015 the USPTO issued a first, non-final action rejecting all 20 claims of the ‘292 Patent respecting our ‘292 Patent, which was undergoing an ex parte re-examination. We were provided the opportunity to discuss the merits of the prior art and the scope of the patent claims with the patent Examiner handling the reexamination and to amend the patent claims. On January 14, 2016 the USPTO ultimately rejected Taser’s efforts and confirmed the validity of the ‘292 patent with 59 claims covering various aspects of our auto-activation technology. On February 2, 2016 the USPTO issued another patent relating our auto-activation technology for law enforcement cameras. U.S. Patent No. 9,253,452 (“the ‘452 patent”) generally covers the automatic activation and coordination of multiple recording devices in response to a triggering event such as a law enforcement officer activating the light bar on the vehicle.

The Company filed suit on January 15, 2016 in the U.S. District Court for the District of Kansas (Case No: 2:16-cv-02032) against Taser, alleging that Taser willfully infringed the ‘292 Patent by selling and offering to sell its Axon camera product line and Signal Performance Power Magazine. The lawsuit was initiated after the USPTO reconfirmed the validity of the ‘292 patent. On February 2, 2016, we amended our complaint against Taser, further alleging that Taser is directly and indirectly liable for infringing the ‘452 Patent. Our amended complaint seeks both monetary damages and a permanent injunction against Taser for infringing both the ‘452 and ‘292 Patents.

In addition to the ‘452 Patent infringement claims, the February 2, 2016 amended complaint added a new set of claims to the lawsuit alleging that Taser conspired to keep us out of the marketplace by engaging in improper, unethical, and unfair competition. The amended lawsuit alleges Taser bribed officials and otherwise conspired to secure no-bid contracts for its products in violation of both state law and federal antitrust law. Our lawsuit also seeks monetary and injunctive relief, including treble damages, for these alleged violations.

On February 19, 2016 TASER asked for and was granted an extension of time to answer or otherwise plead to the complaint alleging willful patent infringement, the bribery of officials and otherwise conspired to secure no-bid contracts for its products in violation of both state law and federal antitrust law. On March 4, 2016, TASER filed a motion to dismiss our complaint which is now pending before the court.

On or about May 22, 2014, Stephen Gans, a former director and former principal shareholder of us, filed a complaint in the Eighth Judicial District Court, Clark County, Nevada that asserts claims against us and Stanton E. Ross, Leroy C. Richie, Daniel F. Hutchins and Elliot M. Kaplan (the “Defendant Directors”), who are members of its Board of Directors. We were served with the complaint on May 28, 2014. Among other things, the complaint alleged (i) that the Defendant Directors breached their fiduciary duties by failing to consider a financing proposal offered by Mr. Gans and his affiliates; and (ii) that the Defendant Directors, acting at the direction of Stanton E. Ross, did not independently and objectively evaluate Mr. Gans’ protestations about certain alleged transactions between us and Infinity Energy Resources, Inc., and by so doing, breached their fiduciary duties. We and the Defendant Directors vigorously defended the claims asserted against us and them. We and the Defendant Directors filed a response denying all of the plaintiff’s allegations and have asserted counter-claims that allege that Gans committed improper acts that included: (a) failing to disclose the nature and substance of an SEC investigation of Gans; (b) engaging in potential insider trading; (c) misappropriating our confidential information; (d) attempting to use his position as a director to personally enrich himself; and (e) making unauthorized, misleading, and factually inaccurate filings to the SEC about us.

On December 11, 2014, the parties agreed in principle to compromise and dismiss with prejudice substantially all of their claims. Within the scope of that settlement are each of the “shareholder derivative claims” that Gans had asserted against us and the Defendant Directors. The settlement to which the parties agreed resulted in no monetary recovery by any party. On April 7, 2015 the Court approved the settlement of all shareholder derivative claims.

We are also involved as a plaintiff and defendant in ordinary, routine litigation and administrative proceedings incidental to its business from time to time, including customer collections, vendor and employment-related matters. We believe that the likely outcome of any other pending cases and proceedings will not be material to our business or financial condition.

Sponsorship. On April 16, 2015 we entered into a Title Sponsorship Agreement under which we became the title sponsor for a Web.com Tour golf tournament (the “Tournament”) held annually in the Kansas City Metropolitan area. Such Agreement provides us with naming rights and other benefits for the 2015 through 2019 annual Tournament in exchange for the following sponsorship fee:

Year	Sponsorship Fee
2015	\$ 375,000
2016	\$ 475,000
2017	\$ 475,000
2018	\$ 500,000
2019	\$ 500,000

We have the right to sell and retain the proceeds from the sale of additional sponsorships, including but not limited to a presenting sponsorship, a concert sponsorship and founding partnerships for the Tournament. We recorded a net sponsorship expense of \$173,335 relating to the 2015 Tournament during the year ended December 31, 2015. Such expense was included in sales and promotional expense in the accompanying statement of operations.

Stock Repurchase Program. On August 25, 2015, the Board of Directors approved a program that authorizes the repurchase of up to \$2.5 million of the Company’s common stock in the open market, or in privately negotiated transactions. The repurchases, if and when made, will be subject to market conditions, applicable rules of the Securities and Exchange Commission and other factors. The repurchase program will be funded using a portion of cash and cash equivalents, along with cash flow from operations. Purchases may be commenced, suspended or discontinued at any time. We have not repurchased any shares under this program as of December 31, 2015.

401 (k) Plan. We sponsor a 401(k) retirement savings plan for the benefit of our employees. The plan, as amended, requires us to provide 100% matching contributions for employees, who elect to contribute up to 3% of their compensation to the plan and 50% matching contributions for employee’s elective deferrals on the next 2% of their contributions. We made matching contributions totaling \$163,227 and \$156,071 for the years ended December 31, 2015 and 2014, respectively. Each participant is 100% vested at all times in employee and employer matching contributions.

Critical Accounting Policies

Our significant accounting policies are summarized in note 1 to our consolidated financial statements included in Item 1, “Financial Statements”, of this report. While the selection and application of any accounting policy may involve some level of subjective judgments and estimates, we believe the following accounting policies are the most critical to our financial statements, potentially involve the most subjective judgments in their selection and application, and are the most susceptible to uncertainties and changing conditions:

- Revenue Recognition / Allowance for Doubtful Accounts;
- Allowance for Excess and Obsolete Inventory;
- Warranty Reserves;
- Stock-based Compensation Expense;
- Accounting for Income Taxes; and
- Determination of Fair Value Calculation for Financial Instruments and Derivatives.

Revenue Recognition / Allowances for Doubtful Accounts. Revenue is recognized for the shipment of products or delivery of service when all four of the following conditions are met:

- (i) Persuasive evidence of an arrangement exists;
- (ii) Delivery has occurred;

- (iii) The price is fixed or determinable; and
- (iv) Collectability is reasonably assured.

We review all significant, unusual or nonstandard shipments of product or delivery of services as a routine part of our accounting and financial reporting process to determine compliance with these requirements. Extended warranties are offered on selected products and when a customer purchases an extended warranty the associated proceeds are treated as deferred revenue and recognized over the term of the extended warranty.

Our principal customers are state, local and federal law enforcement agencies, which historically have been low risks for uncollectible accounts. We also have commercial customers and international distributors who may present a greater risk for uncollectible accounts than such law enforcement customers and we consider a specific reserve for bad debts based on their individual circumstances. Our historical bad debts have been negligible, with less than \$195,000 charged off as uncollectible on cumulative revenues of \$185.8 million since we commenced deliveries during 2006. As of December 31, 2015 and December 31, 2014, we had provided a reserve for doubtful accounts of \$74,997 and \$65,977, respectively.

We periodically perform a specific review of significant individual receivables outstanding for risk of loss due to uncollectibility. Based on such review, we consider our reserve for doubtful accounts to be adequate as of December 31, 2015. However, if the balance due from any significant customer ultimately becomes uncollectible, then our allowance for bad debts will not be sufficient to cover the charge-off and we will be required to record additional bad debt expense in our statement of operations.

Allowance for Excess and Obsolete Inventory. We record valuation reserves on our inventory for estimated excess or obsolete inventory items. The amount of the reserve is equal to the difference between the cost of the inventory and the estimated market value based upon assumptions about future demand and market conditions. On a quarterly basis, management performs an analysis of the underlying inventory to identify reserves needed for excess and obsolescence. We use our best judgment to estimate appropriate reserves based on this analysis. In addition, we adjust the carrying value of inventory if the current market value of that inventory is below its cost.

Inventories consisted of the following at December 31, 2015 and December 31, 2014:

	Years Ended December 31,	
	2015	2014
Raw material and component parts	\$3,833,873	\$2,987,124
Work-in-process	134,641	280,429
Finished goods	7,895,663	6,576,480
Subtotal	11,864,177	9,844,033
Reserve for excess and obsolete inventory	(1,202,411)	(600,578)
Total	<u>\$ 10,661,766</u>	<u>\$ 9,243,455</u>

We balance the need to maintain strategic inventory levels to ensure competitive delivery performance to our customers against the risk of inventory obsolescence due to changing technology and customer requirements. As reflected above, our inventory reserves represented 10.1% of the gross inventory balance at December 31, 2015, compared to 6.1% of the gross inventory balance at December 31, 2014. We had \$1,202,411 and \$600,578 in reserves for obsolete and excess inventories at December 31, 2015 and December 31, 2014, respectively. Total raw materials and component parts were \$3,833,873 and \$2,987,124 at December 31, 2015 and December 31, 2014, respectively, an increase of \$846,749 (28%). The increase in raw materials and component parts is primarily attributable to increased forecasts of sales for the FirstVU HD and the need to secure long lead component inventory items in advance of production. Finished goods balances were \$7,895,663 and \$6,576,480 at December 31, 2015 and December 31, 2014, respectively, an increase of \$1,319,183 (20%). The increase in finished goods was primarily in DVM-750 products and additional cameras for our various products. Finished goods at December 31, 2015 consist primarily of the Laser Ally products, normal levels of our DVM-500 Plus product and the increased DVM-750 product inventories in anticipation of the closing of several significant international contracts. The increase in the inventory reserve is primarily due to the change in sales mix of our products which has resulted in a higher level of excess component parts of the older versions of our legacy products. We believe the reserves are appropriate given our inventory levels at December 31, 2015.

If actual future demand or market conditions are less favorable than those projected by management or significant engineering changes to our products that are not anticipated and appropriately managed, additional inventory write-downs may be required in excess of the inventory reserves already established.

Warranty Reserves. We generally provide up to a two-year parts and labor warranty on our products to our customers. Provisions for estimated expenses related to product warranties are made at the time products are sold. These estimates are established using historical information on the nature, frequency, and average cost of claims. We actively study trends of claims and take action to improve product quality and minimize claims. Our warranty reserves were decreased to \$159,838 as of December 31, 2015 compared to \$247,082 as of December 31, 2014. We have limited experience with the FirstVU HD and DVM-800 and will monitor our reserve for all warranty claims related to these two newer products. There is a risk that we will have higher warranty claim frequency rates and average cost of claims than our history has indicated on our legacy mirror products on our new products for which we have limited experience. Actual experience could differ from the amounts estimated requiring adjustments to these liabilities in future periods.

Stock-based Compensation Expense. We grant stock options to our employees and directors and such benefits provided are share-based payment awards which require us to make significant estimates related to determining the value of our share-based compensation. In 2015, we issued no stock options as we continued our trend of issuing restricted common shares subject to vesting requirements. As such, stock based compensation is now based upon the grant date market value of the restricted shares which is an objective measure.

Accounting for Income Taxes. Accounting for income taxes requires significant estimates and judgments on the part of management. Such estimates and judgments include, but are not limited to, the effective tax rate anticipated to apply to tax differences that are expected to reverse in the future, the sufficiency of taxable income in future periods to realize the benefits of net deferred tax assets and net operating losses currently recorded and the likelihood that tax positions taken in tax returns will be sustained on audit.

As required by authoritative guidance, we record deferred tax assets or liabilities based on differences between financial reporting and tax bases of assets and liabilities using currently enacted rates that will be in effect when the differences are expected to reverse. Authoritative guidance also requires that deferred tax assets be reduced by a valuation allowance if it is more likely than not that some portion or all of the deferred tax asset will not be realized. As of December 31, 2014, cumulative valuation allowances in the amount of \$12,692,000 were recorded in connection with the net deferred income tax assets. Based on a review of our deferred tax assets and recent operating performance, we determined that our valuation allowance should be increased to \$18,105,000 to fully reserve our deferred tax assets at December 31, 2015. We determined that it was appropriate to continue to provide a full valuation reserve on our net deferred tax assets as of December 31, 2015 because of the overall net operating loss carryforwards available. We expect to continue to maintain a full valuation allowance until we determine that we can sustain a level of profitability that demonstrates our ability to realize these assets. To the extent we determine that the realization of some or all of these benefits is more likely than not based upon expected future taxable income, a portion or all of the valuation allowance will be reversed. Such a reversal would be recorded as an income tax benefit and, for some portion related to deductions for stock option exercises, an increase in shareholders' equity.

As required by authoritative guidance, we have performed a comprehensive review of our portfolio of uncertain tax positions in accordance with recognition standards established by the FASB, an uncertain tax position represents our expected treatment of a tax position taken in a filed tax return, or planned to be taken in a future tax return, that has not been reflected in measuring income tax expense for financial reporting purposes. We have no recorded liability as of December 31, 2015 representing uncertain tax positions.

We have generated substantial deferred income tax assets related to our operations primarily from the charge to compensation expense taken for stock options, certain tax credit carryforwards and net operating loss carryforwards. For us to realize the income tax benefit of these assets, we must generate sufficient taxable income in future periods when such deductions are allowed for income tax purposes. In some cases where deferred taxes were the result of compensation expense recognized on stock options, our ability to realize the income tax benefit of these assets is also dependent on our share price increasing to a point where these options have intrinsic value at least equal to the grant date fair value and are exercised. In assessing whether a valuation allowance is needed in connection with our deferred income tax assets, we have evaluated our ability to generate sufficient taxable income in future periods to utilize the benefit of the deferred income tax assets. We continue to evaluate our ability to use recorded deferred income tax asset balances. If we fail to generate taxable income for financial reporting in future years, no additional

tax benefit would be recognized for those losses, since we will not have accumulated enough positive evidence to support our ability to utilize net operating loss carryforwards in the future. Therefore, we may be required to increase our valuation allowance in future periods should our assumptions regarding the generation of future taxable income not be realized.

Determination of Fair Value for Financial Instruments and Derivatives. During 2014 in two separate transactions we issued a total of \$6.0 million of Secured Convertible Notes with detachable warrants to purchase common stock. We elected to record the Secured Convertible Notes on their fair value basis. In addition, the warrants to purchase common stock contained anti-dilution provisions that required them to be accounted for as derivative liabilities. We were required to determine the fair value of these financial instruments outstanding as of December 31, 2015 and 2014 for financial reporting purposes. The entire principal balance of the Secured Convertible Notes had been converted and all warrants had been exercised, except for warrants to acquire 12,200 common shares at \$7.32 per share, as of December 31, 2015.

In accordance with ASC Topic 820 — Fair Value Measurements and Disclosures (“ASC 820”), we utilize the market approach to measure fair value for our financial assets and liabilities. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets, liabilities or a group of assets or liabilities, such as a business.

ASC 820 utilizes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The following is a brief description of those three levels:

- Level 1 — Quoted prices in active markets for identical assets and liabilities
- Level 2 — Other significant observable inputs (including quoted prices in active markets for similar assets or liabilities)
- Level 3 — Significant unobservable inputs (including the Company’s own assumptions in determining the fair value)

The following table represents our hierarchy for our financial assets and liabilities measured at fair value on a recurring basis as of December 31, 2015.

	December 31, 2015			Total
	Level 1	Level 2	Level 3	
Liabilities				
Warrant derivative liability	\$ -	\$ -	\$ 67,053	\$ 67,053
	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 67,053</u>	<u>\$ 67,053</u>

Inflation and Seasonality

Inflation has not materially affected us during the past fiscal year. We do not believe that our business is seasonal in nature; however, we generally generate higher revenues during the second half of the calendar year compared to the first half.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

Not applicable.

Item 8. Financial Statements and Supplementary Data.

Our financial statements are included as an exhibit to this annual report on Form 10-K commencing on page F-1.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures.

Conclusion Regarding the Effectiveness of Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures to provide reasonable assurance of achieving the control objectives, as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934. Based on their evaluation as of December 31, 2015, the end of the period covered by this Annual Report on Form 10-K, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective at a reasonable assurance level to ensure that the information required to be disclosed in reports filed or submitted under the Securities Exchange Act of 1934, including this Annual Report, were recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and was accumulated and communicated to management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Our internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

- Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of our assets;
- Provide reasonable assurance that the transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors; and
- Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the financial statements.

All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

In connection with the filing of this annual report on Form 10-K, our management assessed the effectiveness of our internal control over financial reporting as of December 31, 2015. In making this assessment, our management used the criteria set forth by 2013 Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on our assessment using the framework in 2013 Internal Control – Integrated Framework, management believes that, as of December 31, 2015, our internal control over financial reporting is effective.

This annual report does not include an attestation report of our registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by our registered public accounting firm pursuant to temporary rules of the Securities and Exchange Commission that permit us to provide only management's report in this annual report.

Changes in Internal Control Over Financial Reporting

There have been no changes in our internal controls over financial reporting during the year ended December 31, 2015, that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

Item 9B. Other Information.

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance.

Information with respect to our directors and executive officers is incorporated herein by reference to our definitive proxy statement, to be filed no later than 120 days after December 31, 2015 (our “2016 Proxy Statement”).

Information with respect to compliance with Section 16(a) of the Securities Exchange Act of 1934, as amended, is incorporated herein by reference to our 2016 Proxy Statement.

Information with respect to our code of business conduct and ethics is incorporated herein by reference to our 2016 Proxy Statement.

Information with respect to our corporate governance disclosures is incorporated herein by reference to our 2016 Proxy Statement.

Item 11. Executive Compensation.

Information with respect to the compensation of our executive officers and our directors is incorporated herein by reference to our 2016 Proxy Statement.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

Information with respect to security ownership of certain beneficial owners and management and related stockholder matters, is incorporated herein by reference to our 2016 Proxy Statement.

Item 13. Certain Relationships and Related Transactions, and Director Independence.

Information with respect to certain relationships and related transactions, and director independence is incorporated herein by reference to our 2016 Proxy Statement.

Item 14. Principal Accounting Fees and Services.

Information with respect to the fees paid to and services provided by our principal accountants is incorporated herein by reference to our 2016 Proxy Statement.

PART IV

Item 15. Exhibits, Financial Statement Schedules.

(a) The following documents are filed as part of this annual report on Form 10-K:

1. *Consolidated Financial Statements:*

The consolidated financial statements required to be included in Part II, Item 8, Financial Statements and Supplementary Data, begin on Page F-1 and are submitted as a separate section of this annual report.

2. *Financial Statement Schedules:*

All schedules are omitted because they are not applicable or are not required, or because the required information is included in the consolidated financial statements or notes in this annual report.

3. *Exhibits:*

Exhibit Number	Description	Incorporated by Reference to:	Filed Herewith
2.1	Plan of Merger among Vegas Petra, Inc., a Nevada corporation, and Digital Ally, Inc., a Nevada corporation, and its stockholders, dated November 30, 2004.	Exhibit 2.1 of the Company's Form SB-2, filed October 16, 2006, No. 333-138025 (the "October 2006 Form SB-2").	
3.1	Amended and Restated Articles of Incorporation of Registrant, dated December 13, 2004.	Exhibit 3.1 of the October 2006 Form SB-2.

Notes to the Consolidated Financial Statements F-9 - F-31

Report of Independent Registered Public Accounting Firm

To the Board of Directors
Digital Ally, Inc.

We have audited the accompanying consolidated balance sheet of Digital Ally, Inc. (a Nevada corporation) and subsidiaries (the “Company”) as of December 31, 2015, and the related consolidated statements of operations, stockholders’ equity, and cash flows for the year then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Digital Ally, Inc. and subsidiaries as of December 31, 2015, and the results of their operations and their cash flows for the year then ended in conformity with U. S. generally accepted accounting principles.

Report of Independent Registered Public Accounting Firm

To the Board of Directors
Digital Ally, Inc.

We have audited the accompanying consolidated balance sheet of Digital Ally, Inc. (a Nevada corporation) and subsidiaries (the “Company”) as of December 31, 2014, and the related consolidated statements of operations, stockholders’ equity, and cash flows for the year then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Digital Ally, Inc. and subsidiaries as of December 31, 2014, and the results of their operations and their cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

DIGITAL ALLY, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1. NATURE OF BUSINESS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Business:

Digital Ally, Inc. and subsidiaries (collectively, “Digital Ally,” “Digital,” and the “Company,” “produces digital video imaging and storage products for use in law enforcement, security and commercial applications. Its current products are an in-car digital video/audio recorder contained in a rear-view mirror for use in law enforcement and commercial fleets, a system that provides our law enforcement customers with audio/video surveillance from multiple vantage points and hands-free automatic activation of body-worn cameras and in-car video systems; a weather-resistant mobile digital video recording system for use on motorcycles, ATV’s and boats, a miniature digital video system designed to be worn on an individual’s body; and a hand-held laser speed detection device that it is offering primarily to law enforcement agencies. The Company has active research and development programs to adapt its technologies to other applications. It has the ability to integrate electronic, radio, computer, mechanical, and multi-media technologies to create unique solutions to address needs in a variety of other industries and markets, including mass transit, school bus, taxi cab and the military. The Company sells its products to law enforcement agencies and other security organizations, consumer and commercial fleet operators through direct sales domestically and third-party distributors internationally.

The Company was originally incorporated in Nevada on December 13, 2000 as Vegas Petra, Inc. and had no operations until 2004. On November 30, 2004, Vegas Petra, Inc. entered into a Plan of Merger with Digital Ally, Inc., at which time the merged entity was renamed Digital Ally, Inc.

The following is a summary of the Company’s Significant Accounting Policies:

Basis of Consolidation:

The accompanying financial statements include the consolidated accounts of Digital Ally and its wholly-owned subsidiaries, Digital Ally International, Inc, MP Ally, LLC, and Medical Devices Ally, LLC. All intercompany balances and transactions have been eliminated during consolidation.

Digital Ally formed Digital Ally International, Inc. during August 2009 to facilitate the export sales of its products. In addition, Medical Devices Ally, LLC was formed in July 2014 and MP Ally, LLC was formed in July 2015, both of which have been inactive since formation.

Fair Value of Financial Instruments:

The carrying amounts of financial instruments, including cash and cash equivalents, restricted cash, accounts receivable, accounts payable and subordinated note payable, approximate fair value because of the short-term nature of these items. The Company accounts for its secured convertible notes payable and derivative liabilities on their fair value basis.

Revenue Recognition:

Revenues from the sale of products are recorded when the product is shipped, title and risk of loss have transferred to the purchaser, payment terms are fixed or determinable and payment is reasonably assured. Customers do not have a right to return the product other than for warranty reasons for which they would only receive repair services or replacement product.

The Company sells its products and services to law enforcement and commercial customers in the following manner:

- Sales to domestic customers are made direct to the end customer (typically a law enforcement agency or a commercial customer) through its direct sales force, which is composed of its employees. Revenue is recorded when the product is shipped to the end customer.

- Sales to international customers are made through independent distributors who purchase products from the Company at a wholesale price and sell to the end user (typically law enforcement agencies or a commercial customer) at a retail price. The distributor retains the margin as its compensation for its role in the transaction. The distributor generally maintains product inventory, customer receivables and all related risks and rewards of ownership. Revenue is recorded when the product is shipped to the distributor consistent with the terms of the distribution agreement.
- Repair parts and services for domestic and international customers are generally handled by our inside customer service employees. Revenue is recognized upon shipment of the repair parts and acceptance of the service or materials by the end customer.

Sales taxes collected on products sold are excluded from revenues and are reported as an accrued expense in the accompanying balance sheets until payments are remitted.

Other revenue is comprised of revenues from extended warranties, repair services and the sale of scrap and excess raw material and component parts. Revenue is recognized upon shipment of the product and acceptance of the service or materials by the end customer.

Extended warranties are offered on selected products and when a customer purchases an extended warranty the associated proceeds are treated as deferred revenue and recognized over the term of the extended warranty on a straight line method.

Sales returns and allowances aggregated \$712,872 and \$558,943 for the years ended December 31, 2015 and 2014, respectively. Obligations for sales returns and allowances are recognized at the time of sales on an accrual basis. The accrual is determined based upon historical return rates adjusted for known changes in key variables affecting these return rates.

Use of Estimates:

The preparation of the consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and cash equivalents:

Cash and cash equivalents include funds on hand, in bank and short-term investments with original maturities of ninety (90) days or less.

Cash and cash equivalents that are restricted as to withdrawal or use under the terms of the senior secured note payable are presented as restricted cash separate from cash and cash equivalents on our balance sheet. The restriction was released in 2015 when Secured Note Payable was paid in full.

Accounts Receivable:

Accounts receivable are carried at original invoice amount less an estimate made for doubtful receivables based on a review of all outstanding amounts on a weekly basis. The Company determines the allowance for doubtful accounts by regularly evaluating individual customer receivables and considering a customer's financial condition, credit history, and current economic conditions. Trade receivables are written off when deemed uncollectible. Recoveries of trade receivables previously written off are recorded when received. A trade receivable is considered to be past due if any portion of the receivable balance is outstanding for more than thirty (30) days beyond terms. No interest is charged on overdue trade receivables.

Inventories:

Inventories consist of electronic parts, circuitry boards, camera parts and ancillary parts (collectively, “components”), work-in-process and finished goods, and are carried at the lower of cost (First-in, First-out Method) or market value. The Company determines the estimate for the reserve for slow moving or obsolete inventories by regularly evaluating individual inventory levels, projected sales and current economic conditions.

Furniture, fixtures and equipment:

Furniture, fixtures and equipment is stated at cost net of accumulated depreciation. Additions and improvements are capitalized while ordinary maintenance and repair expenditures are charged to expense as incurred. Depreciation is recorded by the straight-line method over the estimated useful life of the asset, which ranges from three to ten years. Amortization expense on capitalized leases is included with depreciation expense.

Intangible assets:

Intangible assets include deferred patent costs and license agreements. Legal expenses incurred in preparation of patent application have been deferred and will be amortized over the useful life of granted patents. Costs incurred in preparation of applications that are not granted will be charged to expense at that time. The Company has entered into several sublicense agreements under which it has been assigned the exclusive rights to certain licensed materials used in its products. These sublicense agreements generally require upfront payments to obtain the exclusive rights to such material. The Company capitalizes the upfront payments as intangible assets and amortizes such costs over their estimated useful life on a straight line method.

Debt:

The Company’s debt securities are accounted for at amortized cost, except where the Company has elected to account for its secured convertible notes payable on its fair value basis.

Long-Lived Assets:

Long-lived assets such as property, plant and equipment and purchased intangible assets subject to amortization are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. If circumstances require a long-lived asset or asset group be tested for possible impairment, the Company first compares undiscounted cash flows expected to be generated by that asset or asset group to its carrying value. If the carrying value of the long-lived asset or asset group is not recoverable on an undiscounted cash flow basis, an impairment is recognized to the extent that the carrying value exceeds its fair value. Fair value is determined through various valuation techniques, including discounted cash flow models, quoted market values and third-party appraisals, as considered necessary.

Warranties:

The Company’s products carry explicit product warranties that extend up to two years from the date of shipment. The Company records a provision for estimated warranty costs based upon historical warranty loss experience and periodically adjusts these provisions to reflect actual experience. Accrued warranty costs are included in accrued expenses. Extended warranties are offered on selected products and when a customer purchases an extended warranty the associated proceeds are treated as deferred revenue and recognized over the term of the extended warranty.

Customer Deposits:

The Company requires deposits in advance of shipment for certain customer sales orders, in particular when accepting orders from foreign customers for which the Company does not have a payment history. Customer deposits are reflected as a current liability in the accompanying Consolidated Balance Sheets.

Shipping and Handling Costs:

Shipping and handling costs for outbound sales orders totaled \$92,081 and \$70,889 for the years ended

December 31, 2015 and 2014, respectively. Such costs are included in selling, general and administrative expenses in the Consolidated Statements of Operations.

Advertising Costs:

Advertising expense includes costs related to trade shows and conventions, promotional material and supplies, and media costs. Advertising costs are expensed in the period in which they are incurred. The Company incurred total advertising expense of approximately \$848,671 and \$611,175 for the years ended December 31, 2015 and 2014, respectively. Such costs are included in selling, general and administrative expenses in the Consolidated Statements of Operations.

Income Taxes:

Deferred taxes are provided for by the liability method wherein deferred tax assets are recognized for deductible temporary differences and operating loss and tax credit carryforwards and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax basis. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment.

The Company applies the provisions of the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) No. 740 - Income Taxes that provides a framework for accounting for uncertainty in income taxes and provided a comprehensive model to recognize, measure, present, and disclose in its financial statements uncertain tax positions taken or expected to be taken on a tax return. It initially recognizes tax positions in the financial statements when it is more likely than not the position will be sustained upon examination by the tax authorities. Such tax positions are initially and subsequently measured as the largest amount of tax benefit that is greater than 50% likely of being realized upon ultimate settlement with the tax authority assuming full knowledge of the position and all relevant facts. Application requires numerous estimates based on available information. The Company considers many factors when evaluating and estimating its tax positions and tax benefits, and it recognized tax positions and tax benefits may not accurately anticipate actual outcomes. As it obtains additional information, the Company may need to periodically adjust its recognized tax positions and tax benefits. These periodic adjustments may have a material impact on its consolidated statements of operations.

The Company’s policy is to record estimated interest and penalties related to the underpayment of income taxes as income tax expense in the consolidated statements of operations. There was no interest expense related to the underpayment of estimated taxes during the years ended December 31, 2015 and 2014. There have been no penalties in 2015 and 2014.

Research and Development Expenses:

The Company expenses all research and development costs as incurred. Development costs of computer software to be sold, leased, or otherwise marketed are subject to capitalization beginning when a product’s technological feasibility has been established and ending when a product is available for general release to customers. In most instances, the Company’s products are released soon after technological feasibility has been established. Costs incurred subsequent to achievement of technological feasibility were not significant, and software development costs were expensed as incurred during 2015 and 2014.

Stock-Based Compensation:

The Company grants stock-based compensation to its employees, board of directors and certain third party contractors. Share-based compensation arrangements may include the issuance of options to purchase common stock in the future or the issuance of restricted stock, which generally are subject to vesting requirements. The Company records stock-based compensation expense for all stock-based compensation granted after January 1, 2006 based on the grant-date fair value. The Company recognizes these compensation costs on a straight-line basis over the requisite service period of the award.

The Company estimates the grant-date fair value of stock-based compensation using the Black-Scholes valuation model. Assumptions used to estimate compensation expense are determined as follows:

- Expected term is determined using the contractual term and vesting period of the award;
- Expected volatility of award grants made in the Company’s plan is measured using the weighted average of historical daily changes in the market price of the Company’s common stock over the period equal to the expected term of the award;
- Expected dividend rate is determined based on expected dividends to be declared;
- Risk-free interest rate is equivalent to the implied yield on zero-coupon U.S. Treasury bonds with a maturity equal to the expected term of the awards; and
- Forfeitures are based on the history of cancellations of awards granted and management’s analysis of potential forfeitures.

Segments of Business:

Management has determined that its operations are comprised of one reportable segment: the sale of speed detection and digital audio and video recording devices. For the year ended December 31, 2015 and 2014, sales by geographic area were as follows:

	<u>Year ended December 31,</u>	
	<u>2015</u>	<u>2014</u>
Sales by geographic area:		
United States of America	\$ 19,881,541	\$ 16,479,656
Foreign	148,667	961,763
	<u>\$ 20,030,208</u>	<u>\$ 17,441,419</u>

Sales to customers outside of the United States are denominated in U.S. dollars. All Company assets are physically located within the United States.

Recent Accounting Pronouncements:

In May 2014, the FASB issued Accounting Standard Update (“ASU”) No. 2014-09, “Revenue from Contracts with Customers” (“ASU 2014-09”), which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. ASU 2014-09 will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective. The standard is effective for interim and annual periods beginning after December 15, 2017 and permits the use of either the retrospective or cumulative effect transition method. Early adoption is not permitted. The Company has not yet selected a transition method and is currently evaluating the standard and the impact on its consolidated financial statements and footnote disclosures.

In July 2015, the FASB issued ASU 2015-11, Inventory (Topic 330): Simplifying the Measurement of Inventory. The amendments in the ASU require entities that measure inventory using the first-in, first-out or average cost methods to measure inventory at the lower of cost and net realizable value. Net realizable value is defined as estimated selling price in the ordinary course of business less reasonably predictable costs of completion, disposal and transportation. ASU 2015-11 is effective for financial statements issued for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2016 on a prospective basis. This ASU will be effective for the Company for fiscal years beginning after December 15, 2016. Early adoption of ASU 2015-11 is permitted. The Company is currently evaluating the effects adoption of this guidance will have on its consolidated financial statements.

In April 2015, the FASB issued ASU 2015-03, Interest— Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs. This ASU requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. ASU 2015-03 is effective for financial statements issued for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. This ASU will be effective for the Company

for fiscal years beginning after December 15, 2015. Early adoption is permitted, and retrospective application is required. The adoption of this standard is not expected to have a material impact on our financial statements.

NOTE 2. CONCENTRATION OF CREDIT RISK AND MAJOR CUSTOMERS

Financial instruments that potentially subject the Company to concentrations of credit risk consist of accounts receivable. Sales to domestic customers are typically made on credit and the Company generally does not require collateral while sales to international customers require payment before shipment or backing by an irrevocable letter of credit. The Company performs ongoing credit evaluations of its customers' financial condition and maintains an allowance for estimated losses. Accounts are written off when deemed uncollectible and accounts receivable are presented net of an allowance for doubtful accounts. The allowance for doubtful accounts totaled \$74,997 and \$65,977 as of December 31, 2015 and December 31, 2014, respectively.

The Company sells through a network of unaffiliated distributors for international sales and employee-based sales agents for domestic sales. No international distributor individually exceeded 10% of total revenues and no customer receivable balance exceeded 10% of total accounts receivable for the years ended December 31, 2015 and 2014.

The Company purchases finished circuit boards and other proprietary component parts from suppliers located in the United States and on a limited basis from Asia. Although the Company obtains certain of these components from single source suppliers, the Company generally owns all tooling and management has located or is in process of locating alternative suppliers to reduce the risk in most cases to supplier problems that could result in significant production delays. The Company has not historically experienced any significant supply disruptions from any of its principal vendors and does not anticipate future supply disruptions. The Company acquires most of its components on a purchase order basis and does not have long-term contracts with its suppliers.

NOTE 3. ACCOUNTS RECEIVABLE – ALLOWANCE FOR DOUBTFUL ACCOUNTS

The allowance for doubtful accounts receivable was comprised of the following for the years ended December 31, 2015 and December 31, 2014:

	<u>December 31,</u>	
	2015	2014
Beginning balance	\$65,977	\$55,033
Provision for bad debts	46,864	10,944
Charge-offs to allowance, net of recoveries	(37,844)	—
Ending balance	<u>\$74,997</u>	<u>\$65,977</u>

NOTE 4. INVENTORIES

Inventories consisted of the following at December 31, 2015 and December 31, 2014:

	<u>December 31,</u>	
	2015	2014
Raw material and component parts	\$3,833,873	\$2,987,124
Work-in-process	134,641	280,429
Finished goods	7,895,663	6,576,480
Subtotal	11,864,177	9,844,033
Reserve for excess and obsolete inventory	(1,202,411)	(600,578)
Total	<u>\$ 10,661,766</u>	<u>\$ 9,243,455</u>

Finished goods inventory includes units held by potential customers and sales agents for test and evaluation purposes. The cost of such units totaled \$651,004 and \$645,300 as of December 31, 2015 and December 31, 2014, respectively.

NOTE 5. FURNITURE, FIXTURES AND EQUIPMENT

Furniture, fixtures and equipment consisted of the following at December 31, 2015 and December 31, 2014:

	<u>Estimated</u> <u>Useful Life</u>	<u>December 31,</u>	
		<u>2015</u>	<u>2014</u>
Office furniture, fixtures and equipment	3-10 years	\$905,124	\$2,193,877
Warehouse and production equipment	3-5 years	532,339	1,386,427
Demonstration and tradeshow equipment	2-5 years	451,750	442,112
Leasehold improvements	2-5 years	153,828	188,414
Website development	3 years	—	11,178
Other equipment	3 years	—	6,131
Total cost		2,043,041	4,228,139
Less: accumulated depreciation and amortization		(978,855)	(3,182,473)
Net furniture, fixtures and equipment		<u>\$1,064,186</u>	<u>\$1,045,666</u>

Depreciation and amortization of furniture, fixtures and equipment aggregated \$498,810 and \$324,206 for the years ended December 31, 2015 and 2014, respectively.

NOTE 6. INTANGIBLE ASSETS

Intangible assets consisted of the following at December 31, 2015 and 2014:

	<u>December 31, 2015</u>			<u>December 31, 2014</u>		
	<u>Gross value</u>	<u>Accumulated amortization</u>	<u>Net carrying value</u>	<u>Gross value</u>	<u>Accumulated amortization</u>	<u>Net carrying value</u>
Amortized intangible assets:						
Licenses	\$ —	\$ —	\$ —	\$255,000	\$255,000	\$ —
Patents and Trademarks	96,418	47,086	49,331	106,995	42,504	64,491
	<u>96,418</u>	<u>47,086</u>	<u>49,331</u>	<u>361,995</u>	<u>297,504</u>	<u>64,491</u>
Unamortized intangible assets:						
Licenses	\$73,893	\$ —	\$73,893	\$ —	\$ —	\$ —
Patents and Trademarks pending	287,036	—	287,036	181,193	—	181,193
	<u>360,929</u>	<u>—</u>	<u>360,929</u>	<u>181,193</u>	<u>—</u>	<u>181,193</u>
Total	<u>\$457,347</u>	<u>\$47,086</u>	<u>\$ 410,261</u>	<u>\$543,188</u>	<u>\$297,504</u>	<u>\$ 245,684</u>

Patents and trademarks pending will be amortized beginning at the time they are issued by the appropriate authorities. If issuance of the final patent or trademark is denied, then the amount deferred will be immediately charged to expense.

Amortization expense for the years ended December 31, 2015 and 2014 was \$31,313 and \$98,484, respectively. Estimated amortization for intangible assets with definite lives for the next five years ending December 31 and thereafter is as follows:

Year ending in December 31:	
2016	\$29,146
2017	19,064
2018	1,121
2019	—
2020 and thereafter	—
	<u>\$49,331</u>

NOTE 7. SUBORDINATED NOTES PAYABLE, SECURED CONVERTIBLE NOTE PAYABLE, AND CAPITAL LEASE OBLIGATIONS

Subordinated Notes Payable. Subordinated notes payable is comprised of the following:

	<u>December 31,</u>	
	<u>2015</u>	<u>2014</u>
Subordinated notes payable, at par	\$ —	\$2,500,000
Unamortized discount	—	(55,187)
Total notes payable	—	2,444,813
Less: Current maturities of long-term debt	—	2,444,813
Subordinated notes payable, long-term	<u>\$ —</u>	<u>\$ —</u>

During the year ended December 31, 2011, the Company, in two separate transactions, borrowed an aggregate of \$2.5 million under two unsecured notes payable to a private, third-party lender. The loans were funded in May and November 2011 and both are represented by promissory notes (the “Notes”) that bear interest at the rate of 8% per annum and are payable interest only on a monthly basis. The maturity date of the original Note in the principal amount of \$1,500,000 was extended from May 30, 2012 to May 30, 2013 in conjunction with the issuance of the second Note during November 2011. Both Notes were due and payable in full on May 30, 2013 and could be prepaid without penalty at any time. The Notes are subordinated to all existing and future senior indebtedness, as such term is defined in the Notes.

The Company granted the lender warrants (the “Warrants”) exercisable to purchase a total of 56,250 shares of its common stock at an exercise price of \$8.00 per share (as modified) until November 30, 2013. The exercise price for the Warrants exercisable to purchase 37,500 shares issued with the first Note was reduced from \$12.00 per share to \$8.00 per share in consideration for the extension of the first Note’s maturity date. The Company paid fees totaling \$147,500 to an unaffiliated entity and issued warrants exercisable to purchase 13,750 shares of its Common Stock on the same terms and conditions as the Warrants for its services relating to the transactions, including the modification of the Warrants issued pursuant to the first Note.

The Company allocated \$236,726 of the proceeds of the Notes to additional paid-in-capital, which represented the grant date fair value of the Warrant for 56,250 common shares issued to the lender and the warrant for 13,750 shares issued to the unaffiliated third party who arranged the transactions. In addition, the cash fees paid to the unaffiliated third party totaling \$147,500 is included in the discount on the Notes. The modification of the original Note that occurred during November 2011 was treated as an early extinguishment of the debt.

On July 24, 2012, the Company entered into an agreement with the third party lender that extended the maturity date of the Notes from May 30, 2013 to May 30, 2014. In connection with the extension, the Company reduced the exercise price for the Warrants exercisable to purchase 56,250 shares previously granted to the lender from \$8.00 to \$4.00 and extended their expiration date from November 30, 2013 to November 30, 2015. The Company issued an unaffiliated third party a warrant exercisable to purchase 6,250 shares of Common Stock at a price of \$4.00 per share through November 30, 2015 for its services in connection with the extension of the maturity dates of the Notes. Additionally, the Company reduced the exercise price of warrants it had issued to such firm in May and November 2011 from \$8.00 per share to \$4.00 per share and extended their maturity dates to November 30, 2015. Such warrants are exercisable to purchase 13,750 shares of Common Stock. The Company allocated \$38,052 to additional paid in capital, which represented the grant date fair value of the new warrants issued to the independent third party in July 2012 and the modification of the warrants for reducing the exercise price from \$8.00 to \$4.00 associated with extending the maturity date of the Note from May 30, 2013 to May 30, 2014. The restructuring of the Notes that occurred in July 2012 was treated as a modification of the debt and the remaining unamortized discount of the Notes will be amortized to interest expense ratably over the modified terms of the Notes.

On December 4, 2013, the Company entered into an agreement with the same third party lender to extend the maturity date of the Notes from May 30, 2014 to May 30, 2015. In connection with the extension, the Company granted the lender warrants exercisable to purchase 40,000 shares of its common stock at \$8.50 per share through December 3, 2018. The Company also paid fees totaling \$10,000 to an unaffiliated third party and issued a warrant exercisable to purchase 10,000 shares of Common Stock at a price of \$8.50 per share through December 3, 2018 for its services in connection with the extension of the maturity dates of the Notes. The Company allocated \$205,820

to additional paid in capital, which represented the grant date fair value of the new warrants issued to the lender and the unaffiliated third party who arranged the transaction. In addition, the cash fees paid to the unaffiliated third party totaling \$10,000 were included in the discount on the Notes. The restructuring of the Notes that occurred in December 2013 was treated as a modification of the debt and the remaining unamortized discount of the Notes will be amortized to interest expense ratably over the modified terms of the Notes. The discount amortized to interest expense totaled \$55,187 and \$132,447 for the years ended December 31, 2015, and 2014, respectively.

On May 27, 2015, the Company and the Lender agreed to extend the maturity dates of the Notes to July 15, 2015 with all other terms remaining the same. On July 15, 2015, the maturity date of the Notes were further extended to August 15, 2015 and, as consideration for the extension, the Company issued warrants exercisable to purchase 5,000 shares of common stock at an exercise price of \$16.50 with a term of five years. The grant date fair value of such warrants was \$60,224 which was amortized to interest expense over the extended term. On July 24, 2015 the Company paid the outstanding principal and accrued interest on the Notes in full from proceeds of the registered direct offering of common stock and warrants exercisable to purchase common stock. (See Note 10.)

Secured Convertible Note Payable

	December 31, 2015	December 31, 2014
Secured convertible note payable, at fair value	\$ —	\$ 3,273,431
Less: Current maturities	—	(2,019,720)
Secured convertible note payable, long-term	<u>\$ —</u>	<u>\$ 1,253,711</u>

On August 28, 2014, the Company completed a second private placement to the holder of the Secured Convertible Note of \$4.0 million aggregate principal amount of a Secured Convertible Note (the “\$4.0 million Secured Convertible Note”). The \$4.0 million Secured Convertible Note bore interest at 6% per annum, payable quarterly, and was secured by all assets of the Company. Principal payments were not required until the sixth month after origination and continued ratably for the remaining 18-month term of the \$4.0 million Secured Convertible Note. The principal and interest payments could be made through the payment of cash or in-kind by transferring unrestricted and fully registered shares in an amount equivalent to 80% of the volume weighted average trading price for the 20 consecutive trading days preceding the payment date. The \$4.0 million Secured Convertible Note was convertible into shares of common stock at the holder’s option at a conversion price of \$6.10 per share at any time it was outstanding. In addition, the Company could force conversion if the market price exceeded \$12.20 per share for 20 consecutive trading days.

In connection with the second private placement the Company issued a warrant (the “August Warrant”) exercisable to purchase 262,295 shares of common stock at \$7.32 per share. The August Warrant is exercisable immediately and expires August 28, 2019. The \$4.0 million Secured Convertible Note and August Warrant contain anti-dilution provisions and restrict the incurrence of additional secured indebtedness.

The August Warrant was treated as a derivative liability for accounting purposes. Accordingly, the Company has estimated the fair value of the warrant derivative as of the date the \$4.0 million Secured Convertible Note was issued at \$992,521. Changes in the fair value of the warrant derivative liabilities totaled \$1,193,694 through December 31, 2014, and the derivative liability was \$2,186,214 as of December 31, 2014 in the accompanying Consolidated Balance Sheet.

On December 4, 2014, the holder of the \$4.0 million Secured Convertible Note exercised its right to convert \$36,600 of principal into 6,000 shares of common stock of the Company at the conversion price of \$6.10 per share. The increase in fair market value of these 6,000 shares over the \$36,600 principal retired was \$89,400, representing the increase in the Company’s stock price over the conversion rate as of the conversion date. Such amount was recognized as a charge to the income statement during the year ended December 31, 2014 and included in change in fair value of secured convertible notes payable.

The Company paid a placement agent fee of \$240,000 and approximately \$101,500 of third party costs for the transaction, which included legal fees. The Company elected to account for the \$4.0 million Secured Convertible Note on its fair value basis and, therefore, all related debt issuance expenses which totaled \$354,628 were charged to other expenses in the year ended December 31, 2014. The fair market value of the \$4.0 million Secured Note was \$3,273,431 at December 31, 2014 and the \$302,552 change in fair market value of the note was included in change

in fair value of secured notes payable in the Consolidated Statement of Operations.

The holder of the \$4.0 million Secured Convertible Note had no right to convert the Secured Convertible Notes or exercise the Warrants to the extent that such conversions or exercises would result in the holder being the beneficial owner in excess of 4.99% of the Company's stock. In addition, the holder had no right to convert the \$4.0 million Secured Convertible Note or exercise the August Warrant if the issuance of shares of the common stock upon such conversion or exercise would breach the Company's limitation under the applicable Nasdaq listing rules (the "Nasdaq Share Cap"). For these purposes the Nasdaq Share Cap limit applicable to such conversions or exercises of the Secured Convertible Note and the \$4.0 million Secured Convertible Note and the Warrant and August Warrant was based upon the aggregation of such instruments as one issuance and on the number of shares the Company had issued and outstanding when it issued the Secured Convertible Note and Warrant in March 2014. The Nasdaq Share Cap limitation would not apply if the Company's shareholders approve issuances above the Nasdaq Share Cap.

The Company was required to maintain a minimum cash balance of not less than \$1.5 million until such time as the Company satisfied all of the "Equity Conditions," as defined in the \$4.0 million Secured Convertible Note. Such Equity Conditions included the Company's shareholders approving the issuance of shares above the Nasdaq Share Cap. The \$1.5 million minimum cash balance was reported as restricted cash separate from cash and cash equivalents in the Consolidated Balance Sheet as of December 31, 2014.

The Company called a Special Meeting of Shareholders in which it sought approval from its shareholders for issuances of shares above the Nasdaq Share Cap. On February 13, 2015 its shareholders gave such approval. Upon such approval, the Company satisfied all of the "Equity Conditions," which released all of the restrictions on cash balances.

Between February 13 and 25, 2015 the holder of the \$4.0 million Secured Convertible Note exercised its right to convert the remaining principal of \$3,963,780 into 655,738 shares of common stock and 5,475 shares for accrued interest at the conversion price of \$7.32 per share. The increase in fair market value of these 655,213 shares over the \$3,963,780 principal retired was \$4,434,383 representing the increase in our stock price over the conversion rate as of the conversion dates. Such amount was recognized as a charge to the Consolidated Statement of Operations during the year ended December 31, 2015 and included in change in fair value of secured convertible notes payable.

On March 24, 2015 the holder exercised part of its August Warrant to purchase 212,295 shares of common stock with the change in value of the warrant derivative totaling \$340,722 being recognized as income in the Consolidated Statement of Operations representing the change in our stock price compared to the exercise price at the respective exercise date. The holder also exercised part of its August Warrant to purchase 37,800 shares on April 9, 2015 with the change in value of the warrant derivative totaling \$127,951 being recognized as income in the Consolidated Statement of Operations representing the change in our stock price compared to the exercise price at the respective exercise date. As of December 31, 2015, the August Warrant was exercisable to purchase 12,200 common shares remaining under it and was recorded as a liability in the amount of \$67,053 on the Consolidated Balance Sheet.

Capital Leases. Future minimum lease payments under non-cancelable capital leases having terms in excess of one year are as follows:

<u>Year ending December 31:</u>	
2016	\$ 38,258
2017	34,298
2018	8,575
2019	—
2020 and thereafter	—
Total future minimum lease payments	<u>81,131</u>
Less amount representing interest	<u>5,019</u>
Present value of minimum lease payments	76,112
Less current portion	<u>34,828</u>
Capital lease obligations, less current portion	<u><u>\$41,284</u></u>

Assets under capital leases are included in furniture, fixtures and equipment as follows:

	December 31, 2015	December 31, 2014
Office furniture, fixtures and equipment	\$382,928	\$280,304
Less: accumulated amortization	(224,089)	(135,115)
Net furniture, fixtures and equipment	<u>\$158,839</u>	<u>\$145,189</u>

NOTE 8. Fair Value Measurement

In accordance with ASC Topic 820 — Fair Value Measurements and Disclosures (“ASC 820”), the Company utilizes the market approach to measure fair value for its financial assets and liabilities. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets, liabilities or a group of assets or liabilities, such as a business.

ASC 820 utilizes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The following is a brief description of those three levels:

- Level 1 — Quoted prices in active markets for identical assets and liabilities
- Level 2 — Other significant observable inputs (including quoted prices in active markets for similar assets or liabilities)
- Level 3 — Significant unobservable inputs (including the Company’s own assumptions in determining the fair value)

The following table represents the Company’s hierarchy for its financial assets and liabilities measured at fair value on a recurring basis as of December 31, 2015 and December 31, 2014.

	December 31, 2015			
	Level 1	Level 2	Level 3	Total
Liabilities:				
Warrant derivative liability	\$ -	\$ -	\$ 67,053	\$ 67,053
	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 67,053</u>	<u>\$ 67,053</u>
	December 31, 2014			
	Level 1	Level 2	Level 3	Total
Liabilities:				
Warrant derivative liability			\$ 2,186,214	\$ 2,186,214
Secured convertible note	\$ -	\$ -	\$ 3,273,431	\$ 3,273,431
	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 5,459,645</u>	<u>\$ 5,459,645</u>

The following table represents the change in level 3 tier value measurements:

	Warrant Derivative Liability	Secured Convertible Note	Total
December 31, 2014	\$ 2,186,214	\$ 3,273,431	\$ 5,459,645
Conversion of secured convertible note to common stock	-	(3,273,431)	(3,273,431)
Exercise of common stock purchase warrants	(1,748,155)	-	(1,748,155)
Change in fair value	(371,006)	-	(371,006)
December 31, 2015	<u>\$ 67,053</u>	<u>\$ -</u>	<u>\$ 67,053</u>

NOTE 9. ACCRUED EXPENSES

Accrued expenses consisted of the following at December 31, 2015 and December 31, 2014:

	December 31, 2015	December 31, 2014
Accrued warranty expense	\$ 159,838	\$ 247,082
Accrued sales commissions	100,295	89,600
Accrued payroll and related fringes	247,984	154,851
Accrued insurance	34,926	81,431
Accrued rent	224,393	260,634
Accrued litigation and related charges	—	53,666
Other	168,891	255,709
	<u>\$ 936,327</u>	<u>\$1,142,973</u>

Accrued warranty expense was comprised of the following for the years ended December 31, 2015 and 2014:

	2015	2014
Beginning balance	\$247,082	\$167,970
Provision for warranty expense	5,317	198,266
Charges applied to warranty reserve	(92,561)	(119,154)
Ending balance	<u>\$159,838</u>	<u>\$247,082</u>

NOTE 10. COMMON STOCK

On June 9, 2015 at the annual shareholders meeting the shareholders approved the increase in the Company's authorized shares of common stock from 9,375,000 to 25,000,000.

The Company entered into a Securities Purchase Agreement (the "Purchase Agreement") on July 22, 2015 with two investors pursuant to which it issued and sold in an at-the-market registered direct offering (the "Offering"), an aggregate of 879,766 shares (the "Shares") of common stock at an offering price of \$13.64 per share, for gross proceeds of \$12,000,008 before the deduction of the placement agent fee and other offering expenses of \$776,723. In addition to the common stock purchased, the investors received a registered short-term warrant (the "Series A Warrant") exercisable to purchase a total of 437,086 shares of common stock at an exercise price of \$13.43 per share. The Series A Warrants were immediately exercisable and expire on July 22, 2017. The Shares and the Series A Warrants were offered by the Company pursuant to a registration statement on Form S-3 (File No. 333-202944), which was declared effective by the Securities and Exchange Commission (the "Commission") on May 18, 2015 (the "Registration Statement").

In a concurrent private placement (the "Private Placement"), the Company issued two additional warrants to the investors (the "Series B Warrants" and "Series C Warrants"), collectively with the Shares and the Series A Warrants the ("Securities"), with an exercise price of \$13.43 per share. The investors received Series B Warrants to purchase a total of 222,738 shares of common stock and Series C Warrants to purchase a total of 879,766 shares of common stock. The Series B Warrants and Series C Warrants were both immediately exercisable and the Series B Warrants expire on July 22, 2017 and the Series C Warrants expire on January 22, 2021.

Subject to limited exceptions, the holders of the Warrants do not have the right to exercise any portion of its warrants if the holder, together with its affiliates, would beneficially own in excess of 4.99% or 9.99% of the number of shares of Common Stock outstanding immediately after giving effect to such exercise (the "Beneficial Ownership Limitation"); provided, however, that upon 61 days' prior notice to the Company, the holder may increase or decrease the Beneficial Ownership Limitation, but in no event shall the Beneficial Ownership Limitation exceed 9.99%.

The Company was required to file a registration statement on Form S-3 relating to the issuance of the Series B Warrants and Series C Warrants to provide for the resale of the shares of common stock issuable upon the exercise

of such Warrants. The Company has filed a registration statement on Form S-3 (File No. 333-206699), which was declared effective by the Securities and Exchange Commission (the “Commission”) on September 15, 2015 (the “Registration Statement”).

The Purchase Agreement also contained representations, warranties, indemnification and other provisions customary for transactions of this nature. Among other restrictions, the Company is generally prohibited until July 22, 2017 from effecting or entering into an agreement to effect any issuance by the Company of Common Stock or equivalents involving a Variable Rate Transaction. A Variable Rate Transaction generally means a transaction in which the Company (i) issues or sells any debt or equity securities that are convertible into, exchangeable or exercisable for, or include the right to receive additional shares of Common Stock either (A) at a conversion price, exercise price or exchange rate or other price that is based upon and/or varies with the trading prices of or quotations for the shares of Common Stock at any time after the initial issuance of such debt or equity securities, or (B) with a conversion, exercise or exchange price that is subject to being reset at some future date after the initial issuance of such debt or equity security or upon the occurrence of specified or contingent events directly or indirectly related to the business of the Company or the market for the Common Stock or (ii) enters into any agreement, including, but not limited to, an equity line of credit, whereby the Company may issue securities at a future determined price.

The Company entered into a Placement Agreement (the “Placement Agreement”) pursuant to which the Company engaged WestPark Capital, Inc. as the sole placement agent in connection with the Offering and the Private Placement. The Company paid the Placement Agent a placement agent fee in cash of \$720,000 and reimbursed approximately \$30,000 of their out-of-pocket expenses. Other expenses of the offering totaled \$26,723, which included accounting, legal, printing and other expenses. Total issuance costs were \$776,723, which was deducted from the gross proceeds of the offering resulting in net proceeds of \$11,223,285.

The Company used the net proceeds to retire \$2.5 million principal amount of subordinated notes and for general corporate purposes.

NOTE 11. INCOME TAXES

The components of income tax (provision) benefit for the years ended December 31, 2015 and 2014 are as follows:

	<u>2015</u>	<u>2014</u>
Current taxes:		
Federal	\$ —	\$ —
State	—	—
Total current taxes	—	—
Deferred tax (provision) benefit	—	—
Income tax (provision) benefit	<u>\$ —</u>	<u>\$ —</u>

A reconciliation of the income tax (provision) benefit at the statutory rate of 34% for the years ended December 31, 2015 and 2014 to the Company’s effective tax rate is as follows:

	<u>2015</u>	<u>2014</u>
U.S. Statutory tax rate	34.0%	34.0%
State taxes, net of Federal benefit	6.2%	6.2%
Federal Research and development tax credits	1.5%	2.9%
Stock based compensation	0.6%	1.9%
Common stock issued upon conversion of promissory note and related common stock purchase warrants	3.3%	6.7%
Change in valuation reserve on deferred tax assets	(45.0)%	(51.5)%
Other, net	(0.6)%	(0.2)%
Income tax (provision) benefit	<u>0.0%</u>	<u>0.0%</u>

Significant components of the Company's deferred tax assets (liabilities) as of December 31, 2015 and 2014 are as follows:

	<u>2015</u>	<u>2014</u>
Deferred tax assets:		
Stock-based compensation	\$ 1,623,000	\$ 1,206,000
Start-up costs	180,000	180,000
Inventory reserves	480,000	240,000
Uniform capitalization of inventory costs	150,000	97,000
Allowance for doubtful accounts receivable	30,000	26,000
Other reserves	2,000	2,000
Equipment depreciation	—	82,000
Deferred revenue	903,000	433,000
Derivative liabilities	26,000	601,000
Accrued expenses	210,000	275,000
Net operating loss carryforward	12,295,000	7,531,000
Research and development tax credit carryforward	1,747,000	1,568,000
Alternative minimum tax credit carryforward	90,000	90,000
State jobs credit carryforward	230,000	230,000
State research and development credit carryforward ...	280,000	280,000
Charitable contributions carryforward	50,000	—
	<u>18,296,000</u>	<u>12,874,000</u>
Total deferred tax assets	18,296,000	12,874,000
Valuation reserve	(18,105,000)	(12,692,000)
	<u>191,000</u>	<u>182,000</u>
Total deferred tax assets	191,000	182,000
Deferred tax liabilities:		
Equipment depreciation	(6,000)	—
Domestic international sales company	(185,000)	(182,000)
Total deferred tax liabilities	(191,000)	(182,000)
	<u>\$ —</u>	<u>\$ —</u>
Net deferred tax assets (liability)	\$ —	\$ —
Net deferred tax asset (liability) are classified in our consolidated balance sheets as follows:		
Current	\$ —	\$ —
Non-current	\$ —	\$ —

The valuation allowance on deferred tax assets totaled \$18,105,000 and \$12,692,000 as of December 31, 2015 and December 31, 2014, respectively. We record the benefit we will derive in future accounting periods from tax losses and credits and deductible temporary differences as “deferred tax assets”.. In accordance with Accounting Standards Codification (ASC) 740, “Income Taxes,” we record a valuation allowance to reduce the carrying value of our deferred tax assets if, based on all available evidence, it is more likely than not that some or all of the deferred tax assets will not be realized.

The economic recession and its effect on state and local governmental budgets in particular remained weak in 2015 and 2014 and we incurred operating losses during this period. Law enforcement agencies are our primary customer and are typically funded through state and local tax rolls. The economy showed improvement in 2015 and 2014, but the establishment of a long-term positive impact on the state and local budgets is still uncertain at best. Despite the improvement in general economic conditions and our ongoing cost containment efforts, we incurred additional losses in 2015 and 2014 that placed us in a three-year cumulative loss position at December 31, 2015 and 2014. Accordingly, we determined there was not sufficient positive evidence regarding our potential for future profits to outweigh the negative evidence of our three-year cumulative loss position under the guidance provided in ASC 740. Therefore, we determined to increase our valuation allowance by \$5,413,000 to continue to fully reserve our deferred tax assets at December 31, 2015. We expect to continue to maintain a full valuation allowance until we determine that we can sustain a level of profitability that demonstrates our ability to realize these assets. To the extent we determine that the realization of some or all of these benefits is more likely than not based upon expected future taxable income, a portion or all of the valuation allowance will be reversed. Such a reversal would be recorded as an income tax benefit and, for some portion related to deductions for stock option exercises, an increase in shareholders' equity.

At December 31, 2015, the Company had available approximately \$30,700,000 of net operating loss carryforwards available to offset future taxable income generated. Such tax net operating loss carryforwards expire between 2026 and 2035. In addition, the Company had research and development tax credit carryforwards totaling \$1,747,000 available as of December 31, 2015, which expire between 2023 and 2035.

The Internal Revenue Code contains provisions under Section 382 which limit a company's ability to utilize net operating loss carry-forwards in the event that it has experienced a more than 50% change in ownership over a three-year period. Current estimates prepared by the Company indicate that due to ownership changes which have occurred, approximately \$765,000 of its net operating loss and \$175,000 of its research and development tax credit carryforwards are currently subject to an annual limitation of approximately \$1,151,000, but may be further limited by additional ownership changes which may occur in the future. As stated above, the net operating loss and research and development credit carryforwards expire between 2023 and 2035, allowing the Company to potentially utilize all of the limited net operating loss carry-forwards during the carryforward period.

As discussed in Note 1, "Summary of Significant Accounting Policies," tax positions are evaluated in a two-step process. The Company first determines whether it is more likely than not that a tax position will be sustained upon examination. If a tax position meets the more-likely-than-not recognition threshold, it is then measured to determine the amount of benefit to recognize in the financial statements. The tax position is measured as the largest amount of benefit that is greater than 50% likely of being realized upon ultimate settlement. Management has identified no tax positions taken that would meet or exceed these thresholds and therefore there are no gross interest, penalties and unrecognized tax expense/benefits that are not expected to ultimately result in payment or receipt of cash in the consolidated financial statements.

The effective tax rate for the years ended December 31, 2015 and 2014 varied from the expected statutory rate due to the Company continuing to provide a 100% valuation allowance on net deferred tax assets. The Company determined that it was appropriate to continue the full valuation allowance on net deferred tax assets as of December 31, 2015 primarily because of the current year operating losses.

NOTE 12. COMMITMENTS AND CONTINGENCIES

Operating Leases. The Company had a non-cancelable long-term operating lease agreement for office and warehouse space that expires during April 2020. The Company also entered into month-to-month leases for equipment and storage facilities. Rent expense for the years ended December 31, 2015 and 2014 was \$401,845 and \$397,724, respectively, related to these leases. Following are the minimum lease payments for each year and in total.

Year ending December 31:	
2016	\$ 439,707
2017	445,449
2018	451,248
2019	457,327
2020	154,131
	<u>1,974,862</u>

License agreements. The Company has several license agreements under which it has been assigned the rights to certain licensed materials used in its products. Certain of these agreements require the Company to pay ongoing royalties based on the number of products shipped containing the licensed material on a quarterly basis. Royalty expense related to these agreements aggregated \$26,454 and \$27,053 for the years ended December 31, 2015 and 2014, respectively.

Supply and distribution agreement. We entered into a supply and distribution agreement with Dragoneye Technology, LLC ("Dragoneye") on May 1, 2010 under which it was granted the exclusive world-wide right to sell and distribute a proprietary law enforcement speed measurement device and derivatives to its customers. The term of the agreement was 42 months after the date Dragoneye began full scale production of the product which

commenced in August 2010 and final certification of the product was obtained. The agreement had minimum purchase requirements of 1,000 units per period over three commitment periods. On January 31, 2012, the agreement was amended to reduce the minimum purchase commitment over the second and third years by 52% of the original commitment. The Company agreed to release its world-wide right to exclusively market the product to the law enforcement community in exchange for the reduction in the purchase commitment.

The agreement originally required minimum order quantities that represent a remaining unfulfilled commitment to acquire \$634,680 of product as of December 31, 2014. Dragoneye is responsible for all warranty, damage or other claims, losses or liabilities related to the product and is obligated to defend and indemnify us against such risks. The Company held approximately \$1,318,000 of such products in finished goods inventory as of December 31, 2015 and had sold approximately 1,010 units since the beginning of the agreement through December 31, 2015.

The Company filed a lawsuit on June 15, 2013 against Dragoneye for breaching the contract and participated in a mediation of the lawsuit on August 12, 2015 that resulted in a settlement on August 25, 2015. The settlement included the repair of all LaserAlly units the Company held and future customer returned units exhibiting the same failure. See “Litigation” below for further details.

Litigation. The Company is subject to various legal proceedings arising from normal business operations. Although there can be no assurances, based on the information currently available, management believes that it is probable that the ultimate outcome of each of the actions will not have a material adverse effect on the consolidated financial statement of the Company. However, an adverse outcome in certain of the actions could have a material adverse effect on the financial results of the Company in the period in which it is recorded.

On June 5, 2013, the Company filed a lawsuit in the District Court of Johnson County, Kansas against Dragoneye. It had entered into a supply and distribution agreement with Dragoneye on May 1, 2010 under which we were granted the right to sell and distribute a proprietary law enforcement speed measurement device and derivatives to our customers under the trade name LaserAlly. The parties amended the agreement on January 31, 2012. In its complaint the Company alleged that Dragoneye breached the contract because it failed to maintain as confidential information our customer list; it infringed on our trademarks, including LaserAlly and Digital Ally; it tortiously interfered with our existing contracts and business relationships with our dealers, distributors, customers and trading partners; and it engaged in unfair competition and violated the Kansas Uniform Trade Secrets Statutes. The Company amended the complaint to include claims regarding alleged material defects in the products supplied under the agreement. The Company participated in a mediation of the lawsuit on August 12, 2015 and agreed to an omnibus resolution of the matter. The settlement includes the return of and repair free of charge of all LaserAlly units the Company holds and future customer returned units exhibiting the same or similar failure. Dragoneye was be allowed no more than 120 days from October 1, 2015 under which to repair all units, upgrade all units to current firmware release and to re-certify the units. The Company will remit the unpaid balance of approximately \$191,000 (\$91,684.47 remaining at December 31, 2015) currently recorded in accounts payable to Dragoneye in five payments concurrent with the repair and return of units by Dragoneye. Furthermore, all of the remaining minimum contractual purchase requirements will be voided. On August 25, 2015, the judge approved the parties’ joint stipulation of dismissal with prejudice, which finalized the settlement.

On October 25, 2013, we filed a complaint in the United States District Court for the District of Kansas to eliminate threats by a competitor, Utility Associates, Inc. (“Utility”), of alleged patent infringement regarding U.S. Patent No. 6,831,556 (the “ ‘556 patent”). Specifically, the lawsuit seeks a declaration that our mobile video surveillance systems do not infringe any claim of the ‘556 patent. We became aware that Utility had mailed letters to current and prospective purchasers of our mobile video surveillance systems threatening that the use of such systems purchased from third parties not licensed to the ‘556 patent would create liability for them for patent infringement. We reject Utility’s assertion and will vigorously defend the right of end-users to purchase such systems from providers other than Utility. The United States District Court for the District of Kansas dismissed the lawsuit because it decided that Kansas was not the proper jurisdictional forum for the dispute. The District Court’s decision was not a ruling on the merits of the case. We appealed the decision and the Federal Circuit affirmed the District Court’s previous decision.

In addition, the Company began proceedings to invalidate the ‘556 patent through a request for inter partes review of the ‘556 patent at the United States Patent and Trademark Office (“USPTO”). On July 27, 2015, the USPTO invalidated key claims in Utility’s ‘556 Patent. The Final Decision from the USPTO significantly curtails Utility’s ability to threaten law enforcement agencies, municipalities, and others with infringement of the ‘556

Patent. Utility has appealed this decision to the United States Court of Appeals for the Federal Circuit. Briefs have not yet been filed and no schedule for oral argument has been issued. The Company believes that Utility will have a difficult time convincing the appellate court to overturn the decision of the USPTO.

On June 4, 2014 the Company filed an Unfair Competition lawsuit against Utility Associates, Inc. (“Utility”) in the United States District Court for the District of Kansas. In the lawsuit it contends that Utility has defamed the Company and illegally interfered with its contracts, customer relationships and business expectancies by falsely asserting to its customers and others that its products violate the ‘556 Patent, of which Utility claims to be the holder.

The suit also includes claims against Utility for tortious interference with contract and violation of the Kansas Uniform Trade Secrets Act (KUSTA), arising out of Utility’s employment of one of our employees, in violation of that employee’s Non-Competition and Confidentiality agreements with us. In addition to damages, we seek temporary, preliminary, and permanent injunctive relief, prohibiting Utility from, among other things, continuing to threaten or otherwise interfere with our customers. On March 4, 2015, an initial hearing was held upon our request for injunctive relief.

Based upon facts revealed at the March 4, 2015 hearing, on March 16, 2015, the Company sought leave to amend its Complaint in the Kansas suit to assert additional claims against Utility. Those new claims include claims of actual or attempted monopolization, in violation of § 2 of the Sherman Act, claims arising under a new Georgia statute that prohibits threats of patent infringement in “bad faith”, and additional claims of unfair competition/false advertising in violation of § 63(a) of the Lanham Act. As these statutes expressly provide, the Company will seek treble damages, punitive damages and attorneys’ fees as well as injunctive relief. The Court concluded its hearing on April 22, 2015, and allowed the Company leave to amend its complaint, but denied its preliminary injunction. The case is now in the discovery stage. However, the Company believes that the USPTO’s final decision issued on July 27, 2015 will provide it with substantial basis to pursue our claims either through court trial or by summary judgment motions and the Company intends to pursue recovery from Utility, its insurers and other parties, as appropriate.

On June 13, 2014, Utility filed suit in the United States District Court for the Northern District of Georgia against us alleging infringement of the ‘556 patent. The suit was served on us on June 20, 2014. As alleged in our first filed lawsuit described above, we believe the ‘556 patent is both invalid and not infringed. Further, the USPTO has issued its final decision invalidating 23 of the 25 claims asserted in the ‘556 Patent, as noted above. The Company believes that the suit filed by Utility is without merit and is vigorously defending the claims asserted against us. An adverse resolution of the foregoing litigation or patent proceedings could have a material adverse effect on the Company’s business, prospects, results of operations, financial condition, and liquidity. The Court stayed all proceedings with respect to this lawsuit pending the outcome of the patent review performed by the USPTO and the appellate court. Based on the USPTO’s final decision to invalidate substantially all claims contained in the ‘556 patent, the Company intends to file for summary judgment in its favor if Utility does not request outright dismissal.

The Company received notice in April 2015 that TASER International, Inc. (“Taser”), one of our competitor’s, had commenced an action in the United States Patent & Trademark Office (“USPTO”) for a re-examination of its U.S. Patent No. 8,781,292 (“the ‘292 Patent”). A re-examination is essentially a request that the USPTO review whether the patent should have issued in its present form in view of the “prior art,” e.g., other patents in the same technology field. The prior art used by Taser to request the re-examination is a patent application (which never issued into a patent) assigned to an unrelated third party and was not the result of any of Taser’s own research and development efforts.

The Company owns the ‘292 Patent, which is directed to a system that determines when a recording device, such as a law enforcement officer’s body camera or in-car video recorder, begins recording and automatically instructs other recording devices to begin recording. The technology described in the ‘292 Patent is incorporated in our VuLink product.

On August 17, 2015 the USPTO issued a first, non-final action rejecting all 20 claims of the ‘292 Patent respecting its ‘292 Patent under an ex parte re-examination. The Company was provided the opportunity to discuss the merits of the prior art and the scope of the patent claims with the patent Examiner handling the reexamination and to amend the patent claims. On January 14, 2016 the USPTO ultimately rejected TASER’s

efforts and confirmed the validity of the '292 patent with 59 claims covering various aspects of the Company's auto-activation technology. On February 2, 2016 the USPTO issued another patent relating to the Company's auto-activation technology for law enforcement cameras. U.S. Patent No. 9,253,452 ("the '452 patent") generally covers the automatic activation and coordination of multiple recording devices in response to a triggering event such as a law enforcement officer activating the light bar on the vehicle.

The Company filed suit on January 15, 2016 in the U.S. District Court for the District of Kansas (Case No: 2:16-cv-02032) against Taser, alleging that Taser willfully infringed the '292 Patent by selling and offering to sell its Axon camera product line and Signal Performance Power Magazine. The lawsuit was initiated after the USPTO reconfirmed the validity of the '292 patent. On February 2, 2016, the Company amended its complaint against Taser, further alleging that Taser is directly and indirectly liable for infringing the '452 Patent. The Company's amended complaint seeks both monetary damages and a permanent injunction against Taser for infringing both the '452 and '292 Patents.

In addition to the '452 Patent infringement claims, the February 2, 2016 amended complaint added a new set of claims to the lawsuit alleging that TASER conspired to keep Digital Ally out of the marketplace by engaging in improper, unethical, and unfair competition. The amended lawsuit alleges TASER bribed officials and otherwise conspired to secure no-bid contracts for its products in violation of both state law and federal antitrust law. Digital Ally's lawsuit also seeks monetary and injunctive relief, including treble damages, for these alleged violations.

On February 19, 2016 TASER asked for and was granted an extension of time to answer or otherwise plead to the complaint alleging willful patent infringement, the bribery of officials and otherwise conspired to secure no-bid contracts for its products in violation of both state law and federal antitrust law. On March 4, 2016, TASER filed a motion to dismiss our complaint which is now pending before the court.

On or about May 22, 2014, Stephen Gans, a former director and former principal shareholder of us, filed a complaint in the Eighth Judicial District Court, Clark County, Nevada that asserts claims against us and Stanton E. Ross, Leroy C. Richie, Daniel F. Hutchins and Elliot M. Kaplan (the "Defendant Directors"), who are members of its Board of Directors. We were served with the complaint on May 28, 2014. Among other things, the complaint alleged (i) that the Defendant Directors breached their fiduciary duties by failing to consider a financing proposal offered by Mr. Gans and his affiliates; and (ii) that the Defendant Directors, acting at the direction of Stanton E. Ross, did not independently and objectively evaluate Mr. Gans' protestations about certain alleged transactions between us and Infinity Energy Resources, Inc., and by so doing, breached their fiduciary duties. We and the Defendant Directors vigorously defended the claims asserted against us and them. We and the Defendant Directors filed a response denying all of the plaintiff's allegations and have asserted counter-claims that allege that Gans committed improper acts that included: (a) failing to disclose the nature and substance of an SEC investigation of Gans; (b) engaging in potential insider trading; (c) misappropriating our confidential information; (d) attempting to use his position as a director to personally enrich himself; and (e) making unauthorized, misleading, and factually inaccurate filings to the SEC about us.

On December 11, 2014, the parties agreed in principle to compromise and dismiss with prejudice substantially all of their claims. Within the scope of that settlement are each of the "shareholder derivative claims" that Gans had asserted against us and the Defendant Directors. The settlement to which the parties agreed resulted in no monetary recovery by any party. On April 7, 2015 the Court approved the settlement of all shareholder derivative claims.

The Company is also involved as a plaintiff and defendant in ordinary, routine litigation and administrative proceedings incidental to its business from time to time, including customer collections, vendor and employment-related matters. The Company believes the likely outcome of any other pending cases and proceedings will not be material to its business or its financial condition.

Sponsorship. On April 16, 2015 the Company entered into a Title Sponsorship Agreement (the "Agreement") under which it became the title sponsor for a Web.com Tour golf tournament (the "Tournament") held annually in the Kansas City Metropolitan area. The Agreement provides the Company with naming rights and other benefits for the 2015 through 2019 annual Tournament in exchange for the following sponsorship fee:

Year	Sponsorship Fee
2015	\$ 375,000
2016	\$ 475,000
2017	\$ 475,000
2018	\$ 500,000
2019	\$ 500,000

The Company has the right to sell and retain the proceeds from the sale of additional sponsorships including but not limited to a presenting sponsorship, a concert sponsorship and founding partnerships for the Tournament. The Company recorded a net sponsorship expense of \$173,335 relating to the 2015 Tournament during the year ended December 31, 2015. Such expense was included in sales and promotional expense in the Consolidated Statements of Operations.

Stock Repurchase Program. On August 25, 2015, the Board of Directors approved a program that authorizes the repurchase of up to \$2.5 million of the Company’s common stock in the open market, or in privately negotiated transactions. The repurchases, if and when made, will be subject to market conditions, applicable rules of the Securities and Exchange Commission and other factors. The repurchase program will be funded using a portion of cash and cash equivalents, along with cash flow from operations. Purchases may be commenced, suspended or discontinued at any time. The Company has not repurchased any shares under this program as of December 31, 2015.

401 (k) Plan. In July 2008, the Company amended and restated its 401(k) retirement savings plan. The amended plan requires the Company to provide 100% matching contributions for employees who elect to contribute up to 3% of their compensation to the plan and 50% matching contributions for employee’s elective deferrals on the next 2% of their contributions. The Company has made matching contributions totaling \$163,227 and \$156,071 for the years ended December 31, 2015 and 2014, respectively. Each participant is 100% vested at all times in employee and employer matching contributions.

NOTE 13. STOCK-BASED COMPENSATION

The Company recorded pretax compensation expense related to the grant of stock options and restricted stock issued of \$1,623,033 and \$834,593 for the years ended December 31, 2015 and 2014, respectively.

As of December 31, 2015, the Company had adopted seven separate stock option and restricted stock plans: (i) the 2005 Stock Option and Restricted Stock Plan (the “2005 Plan”), (ii) the 2006 Stock Option and Restricted Stock Plan (the “2006 Plan”), (iii) the 2007 Stock Option and Restricted Stock Plan (the “2007 Plan”), (iv) the 2008 Stock Option and Restricted Stock Plan (the “2008 Plan”), (v) the 2011 Stock Option and Restricted Stock Plan (the “2011 Plan”), (vi) the 2013 Stock Option and Restricted Stock Plan (the “2013 Plan”) and (vii) the 2015 Stock Option and Restricted Stock Plan (the “2015 Plan”). These Plans permit the grant of stock options or restricted stock to its employees, non-employee directors and others totaling 1,475,000 shares of common stock. The 2005 Plan expired during 2015 with 28 shares reserved for awards which are now unavailable for issuance. The Company believes that such awards better align the interests of its employees with those of its shareholders. Option awards have been granted with an exercise price equal to the market price of the Company’s stock at the date of grant with such option awards generally vesting based on the completion of continuous service and having ten-year contractual terms. These option awards provide for accelerated vesting if there is a change in control (as defined in the Plans) or the death or disability of the holder. The Company has registered all shares of common stock that are issuable under its Plans with the SEC. A total of 75,002 shares remained available for grant under the various Plans as of December 31, 2015.

In addition to the Stock Option and Restricted Stock Plans described above, the Company has issued other options outside of these Plans to non-employees for services rendered that are subject to the same general terms as the Plans, of which 1,250 options are fully vested and remain outstanding as of December 31, 2015.

The fair value of each option award is estimated on the date of grant using a Black-Scholes option valuation model. There were no stock options issued during 2015. Activity in the various Plans during the year ended December 31, 2015 is reflected in the following table:

Options	Shares	Weighted Average Exercise Price
Outstanding at January 1, 2015	370,743	\$18.97
Granted	—	—
Exercised	(39,928)	(7.59)
Forfeited	(2,125)	(6.96)
Outstanding at December 31, 2015	<u>328,690</u>	<u>\$ 20.43</u>
Exercisable at December 31, 2015	<u>284,390</u>	<u>\$ 23.06</u>
Weighted-average fair value for options granted during the period at fair value	<u>—</u>	<u>\$ —</u>

The Plans allow for the cashless exercise of stock options. This provision allows the option holder to surrender/cancel options with an intrinsic value equivalent to the purchase/exercise price of other options exercised. There were no shares surrendered pursuant to cashless exercises during the year ended December 31, 2015.

At December 31, 2015, the aggregate intrinsic value of options outstanding was approximately \$262,297, and the aggregate intrinsic value of options exercisable was approximately \$140,281. The aggregate intrinsic value of options exercised during the year ended December 31, 2015 was \$281,792.

As of December 31, 2015, the unamortized portion of stock compensation expense on all existing stock options was \$30,098, which will be recognized over the next 20 months.

The following table summarizes the range of exercise prices and weighted average remaining contractual life for outstanding and exercisable options under the Company's option plans as of December 31, 2015:

Exercise price range	Outstanding options		Exercisable options	
	Number of options	Weighted average remaining contractual life	Number of options	Weighted average remaining contractual life
\$0.01 to \$3.99	63,124	7.3 years	21,438	6.4 years
\$4.00 to \$6.99	37,625	6.8 years	35,886	6.9 years
\$7.00 to \$9.99	19,069	5.7 years	18,194	5.7 years
\$10.00 to \$12.99	52,808	1.4 years	52,808	1.4 years
\$13.00 to \$15.99	51,439	4.7 years	51,439	4.7 years
\$16.00 to \$18.99	1,250	1.5 years	1,250	1.5 years
\$19.00 to \$29.99	6,500	3.6 years	6,500	3.6 years
\$30.00 to \$55.00	96,875	1.9 years	96,875	1.9 years
	<u>328,690</u>	<u>4.1 years</u>	<u>284,390</u>	<u>3.6 years</u>

Restricted stock grants. The Board of Directors has granted restricted stock awards under the Plans. Restricted stock awards are valued on the date of grant and have no purchase price for the recipient. Restricted stock awards typically vest over six months to four years corresponding to anniversaries of the grant date. Under the Plans, unvested shares of restricted stock awards may be forfeited upon the termination of service to or employment with the Company, depending upon the circumstances of termination. Except for restrictions placed on the transferability of restricted stock, holders of unvested restricted stock have full stockholder's rights, including voting rights and the right to receive cash dividends.

A summary of all restricted stock activity under the equity compensation plans for the year ended December 31, 2015 is as follows:

	<u>Restricted stock</u>	<u>Weighted average grant date fair value</u>
Nonvested balance, January 1, 2015	188,500	\$ 5.32
Granted	326,500	8.42
Vested	(158,500)	(4.73)
Forfeited	(2,000)	(5.70)
Nonvested balance, December 31, 2015	<u>354,500</u>	<u>\$ 8.43</u>

The Company estimated the fair market value of these restricted stock grants based on the closing market price on the date of grant. As of December 31, 2015, there were \$1,552,495 of total unrecognized compensation costs related to all remaining non-vested restricted stock grants, which will be amortized over the next 48 months in accordance with the vesting scale.

The nonvested balance of restricted stock vests as follows:

<u>Year ended December 31,</u>	<u>Number of Shares</u>
2015	135,900
2016	75,150
2018	69,050
2019	74,400

NOTE 14. COMMON STOCK PURCHASE WARRANTS

The Company issued common stock purchase warrants (the “Warrants”) in conjunction with the original issuance and extension of the Subordinated Notes Payable, the \$4.0 million Secured Convertible Note (see Note 5) and the July 2015 registered direct offering (See Note 8). The Warrants are immediately exercisable and allow the holders to purchase up to 1,599,290 shares of common stock at \$4.00 to \$7.32 per share after modification. The Warrants expire from July 22, 2017 through January 22, 2021 and allow for cashless exercise.

	<u>Warrants</u>	<u>Weighted Average Exercise Price</u>
Vested Balance, January 1, 2015	306,481	\$ 7.47
Granted	1,544,590	13.39
Exercised	(250,095)	(7.32)
Cancelled	(1,686)	(4.00)
Vested Balance, December 31, 2015	<u>1,599,290</u>	<u>\$ 13.25</u>

The total intrinsic value of all outstanding warrants aggregated \$-0- as of December 31, 2015 and the weighted average remaining term is 43 months.

The following table summarizes the range of exercise prices and weighted average remaining contractual life for outstanding and exercisable warrants to purchase common shares as of December 31, 2015:

Exercise price	Outstanding and exercisable warrants	
	Number of options	Weighted average remaining contractual life
\$7.32	12,200	3.7 years
\$8.50	42,500	2.9 years
\$13.43	659,824	1.6 years
\$13.43	879,766	5.1 years
\$16.50	5,000	4.5 years
	<u>1,599,290</u>	<u>3.5 years</u>

NOTE 15. RELATED PARTY TRANSACTIONS

On June 15, 2015 the Company entered into a consulting agreement with a relative of the Company's President and Chairman to provide product research, development, advertising and marketing for new products in its commercial fleet business. The fee is \$10,000 per month plus expenses and continues for the lesser of nine months or a total of \$65,000 is paid for such services, exclusive of approved expenses. During the year ended December 31, 2015, total fees included in research and development for this related party was \$65,000 and at December 31, 2015, amounts owed to this related party for consulting fees was \$10,000 which was included in accounts payable.

NOTE 16. NET LOSS PER SHARE

The calculation of the weighted average number of shares outstanding and loss per share outstanding for the years ended December 31, 2015 and 2014 are as follows:

	Year ended December 31,	
	2015	2014
Numerator for basic and diluted income per share – Net loss	<u>\$(12,037,892)</u>	<u>\$(9,163,261)</u>
Denominator for basic loss per share – weighted average shares outstanding	4,340,012	2,590,002
Dilutive effect of shares issuable under stock options and warrants outstanding	—	—
Denominator for diluted loss per share – adjusted weighted average shares outstanding	<u>4,340,012</u>	<u>2,590,002</u>
Net loss per share:		
Basic	\$(2.77)	\$(3.54)
Diluted	\$(2.77)	\$(3.54)

Basic loss per share is based upon the weighted average number of common shares outstanding during the period. For the years ended December 31, 2015 and 2014, all outstanding stock options to purchase common stock were antidilutive, and, therefore, not included in the computation of diluted income (loss) per share.

NOTE 17. SUBSEQUENT EVENTS

The Company filed suit on January 15, 2016 in the U.S. District Court for the District of Kansas (Case No: 2:16-cv-02032) against TASER International, Inc. ("Taser"), alleging willful patent infringement against Taser's Axon body camera product line. The lawsuit was initiated after the United States Patent Office ("USPTO") reconfirmed the validity of U.S. Patent No. 8,781,292 ("the '292 patent") which covers various aspects of auto-

activation and multiple camera coordination for body-worn cameras and in-car video systems. The '292 patent previously was subject to attack by Taser, who tried to invalidate it at the USPTO. The USPTO ultimately rejected Taser's efforts and confirmed the validity of the '292 patent with 59 claims covering various aspects of this valuable auto-activation technology. On February 2, 2016 the USPTO issued another patent relating to the Company's auto-activation technology for law enforcement cameras. U.S. Patent No. 9,253,452 ("the '452 patent") generally covers the automatic activation and coordination of multiple recording devices in response to a triggering event such as a law enforcement officer activating the light bar on the vehicle. The Company added the '452 Patent to its existing lawsuit against Taser seeking both monetary damages and a permanent injunction against Taser for infringement of both the '452 and '292 Patents.

In addition to the infringement claims, the Company added a new set of claims to the lawsuit alleging that Taser conspired to keep the Company Ally out of the marketplace by engaging in improper, unethical, and unfair competition. The amended lawsuit alleges Taser bribed officials and otherwise conspired to secure no-bid contracts for its products in violation of both state law and federal antitrust law. The Company's lawsuit also seeks monetary and injunctive relief, including treble damages, for these alleged violations. See Litigation for further details.

On February 19, 2016 TASER asked for and was granted an extension of time to answer or otherwise plead to the complaint alleging willful patent infringement, the bribery of officials and otherwise conspired to secure no-bid contracts for its products in violation of both state law and federal antitrust law. On March 4, 2016, TASER filed a motion to dismiss our claim which is now pending before the court.
