

Digital Ally Receives Patent For Law Enforcement Breathalyzers

Newly Issued Patent To Integrate Breathalyzer and Recording Devices

Lenexa, KS | August 27, 2019

Digital Ally, Inc. (NASDAQ: DGLY), which develops, manufactures and markets advanced video recording products for law enforcement, emergency management, fleet safety and security, is pleased to announce the expansion of the Company's patent portfolio to include U.S. Patent No. 10,390,732 (the " '732 Patent"). The '732 Patent will allow for a device and software to interface with breath analysis devices and the Company's digital video recording devices to capture meta-data for law enforcement officers when conducting traffic stops, specifically field sobriety tests. Meta-data captured, like Blood Alcohol Content (BAC), will be overlaid onto the video captured by either the in-car video system or body-worn camera. The '732 Patent will aid in authenticating, preserving, and presenting the process and results of the breath analysis test in court, which are subject to human error.

The '732 Patent is an expansion of Digital Ally's patented VuLink, automatic activation technology. This innovative technology will allow for activation of the Company's recording devices when a breath analysis device is activated. For example, an officer is conducting a field sobriety test and triggers his or her breath analysis device, the automatic recording from the Company's camera system will begin. When the test is complete, meta-data from the breath analysis device and video from the recording devices will be synced, stored and embedded in the Company's back-office solution.

"We are very excited to continue to expand our patent portfolio to include the '732 Patent and to build on our patented VuLink technology," stated Stan Ross, CEO of Digital Ally. "Along with the release of EVO-HD, our newest in-car video system, the '732 Patent solidifies our foothold in the law enforcement industry for many years to come."

About Digital Ally

[Digital Ally](#)[®], headquartered in Lenexa, KS, specializes in the design and manufacturing of the highest quality video recording equipment and video analytic software. Digital Ally pushes the boundaries of technology in industries such as law enforcement, emergency management, fleet safety and security. Digital Ally's complete product solutions include in-car and body cameras, cloud and local management software, and automatic recording technology. Digital Ally products are sold by domestic direct sales representatives and international distributors worldwide.

This press release contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Act of 1934. These forward-looking statements are based largely on the expectations or forecasts of future events, can be affected by inaccurate assumptions, and are subject to various business risks and known and unknown uncertainties, a number of which are beyond the control of management. Therefore, actual results could differ materially from the forward-looking statements contained in this press release. A wide variety of factors that may cause actual results to differ from the forward-looking statements include, but are not limited to, the following: whether the '732 Patent will solidify the Company's foothold in the law enforcement market in the future; whether the Company will be able to adapt the technology underlying the '732 Patent to perform as intended; competition from larger, more established companies with far greater economic and human resources; its ability to attract and retain customers and quality employees; the effect of changing economic conditions; and changes in government regulations, tax rates and similar matters. These cautionary statements should not be construed as exhaustive or as any admission as to the adequacy of the Company's disclosures. The Company cannot predict or determine after the fact what factors would cause actual results to differ materially from those indicated by the forward-looking statements or other statements. The reader should consider statements that include the words "believes", "expects", "anticipates", "intends", "estimates", "plans", "projects", "should", or other expressions that are predictions of or indicate future events or trends, to be uncertain and forward-looking. The Company does not undertake to publicly update or revise forward-looking statements, whether as a result of new information, future events or otherwise. Additional information respecting factors that could materially affect the Company and its operations are contained in its annual report on Form 10-K for the year ended December 31, 2018 and quarterly report on Form 10-Q for the three and six months ended June 30, 2019, as filed with the Securities and Exchange Commission.
