

VuVault®

Locally Based Video Management Software

Secure

Complete control of your digital video evidence.

Simple

Automatically upload your videos.

Easy

All of your department's videos and easy reporting tools at your fingertips.

VU VAULT®

The VuVault® back office software suite enables law enforcement agencies to quickly and easily manage their digital video evidence across all of Digital Ally's products. VuVault® is utilized for playing back, downloading, archiving, reviewing, unit configuration and management, running customizable reports and chain of custody logs as well as exporting/ burning videos to DVD's for court.

Comprehensive Management Reporting | Chain of Custody | CJIS Compliance

Our VuVault software solutions ensure your agency not only meets compliance standards, but also gives you the tools to effectively manage your users and devices. You can run reports on just about anything. Some examples include: User Reports, Account Summary, Video Detail Reports, and Chain of Custody Reports.

Precise Location Data Video GPS Tracking

Collect important locational data such as course traveled during the course of a recording, current position of vehicle during playback, location and details of starting and stopping points and any marks within the video. A variety of flags have been set up to give you all the information you may need to associate with the videos your devices record.
